

# Assessing Family Availability to Care for Older Adults with a High Risk of Dementia

HwaJung Choi, Bingxin Chen, Lu Qin, and Noah Webster      University of Michigan

41% of U.S. adults with a high risk of dementia have low family care availability

- Most in this group have no spouse & no co-resident adult child

| INTRODUCTION                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | METHODS                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | RESULTS
