

From Mapping The Situation To Test Actions For Dementia Prevention, Recognition, And Care In Brazil: The ReNaDe2 Program

Fabiana A. F. da Mata, Carolina Godoy, Lucas Martins Teixeira, Marcelo Anastácio Diniz, Paula Vilhena Carnevale Vianna, Matheus G. Barbosa, Andrew Christopher Claro Miguel, Thais Suarez, Ana Ágatha, Pedro Pinho, Fernanda Farias de Menezes, Rosa Camila Lucchetta, Cleusa P. Ferri.

The ReNaDe2 program aims to identify and validate strategies that support the Brazilian Ministry of Health in developing policies to reduce dementia risk, decrease underdiagnosis within the National Public Health System, and improve care for people living with dementia and their families in Brazil.

BACKGROUND	METHODS	RESULTS	CONCLUSIONS																																												
We have led the first two national reports on dementia in Brazil: Relatório Nacional sobre a Demência no Brasil: Epidemiologia, reconhecimento e projeções futuras  Relatório Nacional sobre a Demência no Brasil: Necessidades de cuidado, custos, produção científica e investimento em políticas  Epidemiology, rates of underdiagnosis, costs, research investment, scientific production, met and unmet care needs of people using the Brazilian Unified Health System (SUS). ReNaDe2 Relatório Nacional sobre a Demência no SUS Prevenir, Reconhecer e Cuidar Tests the feasibility of practical, scientifically grounded interventions within the SUS, focusing on dementia prevention, reducing underdiagnosis rates, and improving care delivery for people living with dementia and their carers	ReNaDe2 program includes 4 nationwide projects 1 FUTURE em mente Estratégias para prevenção da demência no Brasil <i>Future in Mind – Aims to produce recommendations for dementia prevention by analyzing strategies for preventing dementia risk factors</i> 2 REDe Reconhecimento e Educação em Demência Aims to reduce underdiagnosis via in-person and distance training of Primary Care Unit teams and via community-based actions 3 CST Cognitive Stimulation Therapy VERSÃO BRASILEIRA Feasibility test of a 14-session psychosocial intervention designed to improve engagement and cognition in people living with dementia. SUS: eMulti, CAPS, hospitals 4 ESCADA Estratégias para CuidAdores em Demência START (STrategies for RelaTives) - Versão Brasileira Feasibility test of a home-based intervention (START) to improve the mental health and quality of life of family carers by 8 individual meetings with trained community health workers.	 Educational materials for professionals and caregivers have been developed and are currently in use in local health networks. Feasibility data collection is ongoing. <table><tr><th colspan="2">ReNaDe 2</th><th>Numbers</th></tr><tr><td>States</td><td></td><td>25</td></tr><tr><td rowspan="4">Municipalities</td><td>Small size</td><td>6</td></tr><tr><td>Medium size</td><td>16</td></tr><tr><td>Large size</td><td>7</td></tr><tr><td>Total</td><td>29</td></tr><tr><td>Trained professionals</td><td></td><td>1,260</td></tr><tr><td>People living with dementia</td><td></td><td>94</td></tr><tr><td>Carers</td><td></td><td>93</td></tr></table> Note: Brazil is a federation composed of three entities - municipalities, states and the Union -, which are administratively independent and autonomous <table><tr><th>Initiative territory</th><th>Level of government responsible</th><th>Initiative scope</th><th>Examples</th></tr><tr><td rowspan="2">Local</td><td rowspan="2">Municipal</td><td>Awareness raising campaigns</td><td>• Municipal day for the prevention and combat of diabetes, discussion circles</td></tr><tr><td>Person-centred care</td><td>• Hypertension Prevention Campaign (measurements in public parks) • Public pilates classes and physical exercises for older people • Community centers for older people</td></tr><tr><td rowspan="2">Regional</td><td rowspan="2">State</td><td>Planning</td><td>• State plan for the prevention and control of deforestation and fires</td></tr><tr><td>Awareness raising campaigns</td><td>• Smoke-free policies in public and collective spaces • <i>Hiperdia</i> (registration and monitoring of people with hypertension and diabetes) • <i>Academia da Saúde</i> : free of charge physical activity programs in public spaces • <i>Saúde na Escola</i> Program: visual and hearing loss screening in public school students • <i>Bolsa Família</i> Program (compulsory schooling attendance for receiving the benefit)</td></tr><tr><td>National</td><td>Federal</td><td>Person-centered care Planning</td><td></td></tr></table>	ReNaDe 2		Numbers	States		25	Municipalities	Small size	6	Medium size	16	Large size	7	Total	29	Trained professionals		1,260	People living with dementia		94	Carers		93	Initiative territory	Level of government responsible	Initiative scope	Examples	Local	Municipal	Awareness raising campaigns	• Municipal day for the prevention and combat of diabetes, discussion circles	Person-centred care	• Hypertension Prevention Campaign (measurements in public parks) • Public pilates classes and physical exercises for older people • Community centers for older people	Regional	State	Planning	• State plan for the prevention and control of deforestation and fires	Awareness raising campaigns	• Smoke-free policies in public and collective spaces • <i>Hiperdia</i> (registration and monitoring of people with hypertension and diabetes) • <i>Academia da Saúde</i> : free of charge physical activity programs in public spaces • <i>Saúde na Escola</i> Program: visual and hearing loss screening in public school students • <i>Bolsa Família</i> Program (compulsory schooling attendance for receiving the benefit)	National	Federal	Person-centered care Planning		REDe and ESCADA interventions may have the potential to be feasible, scalable, and accessible through the SUS. ReNaDe2 highlights promising pathways for comprehensive dementia care in Brazil that account for regional differences and equitable access.
