Study Objective:

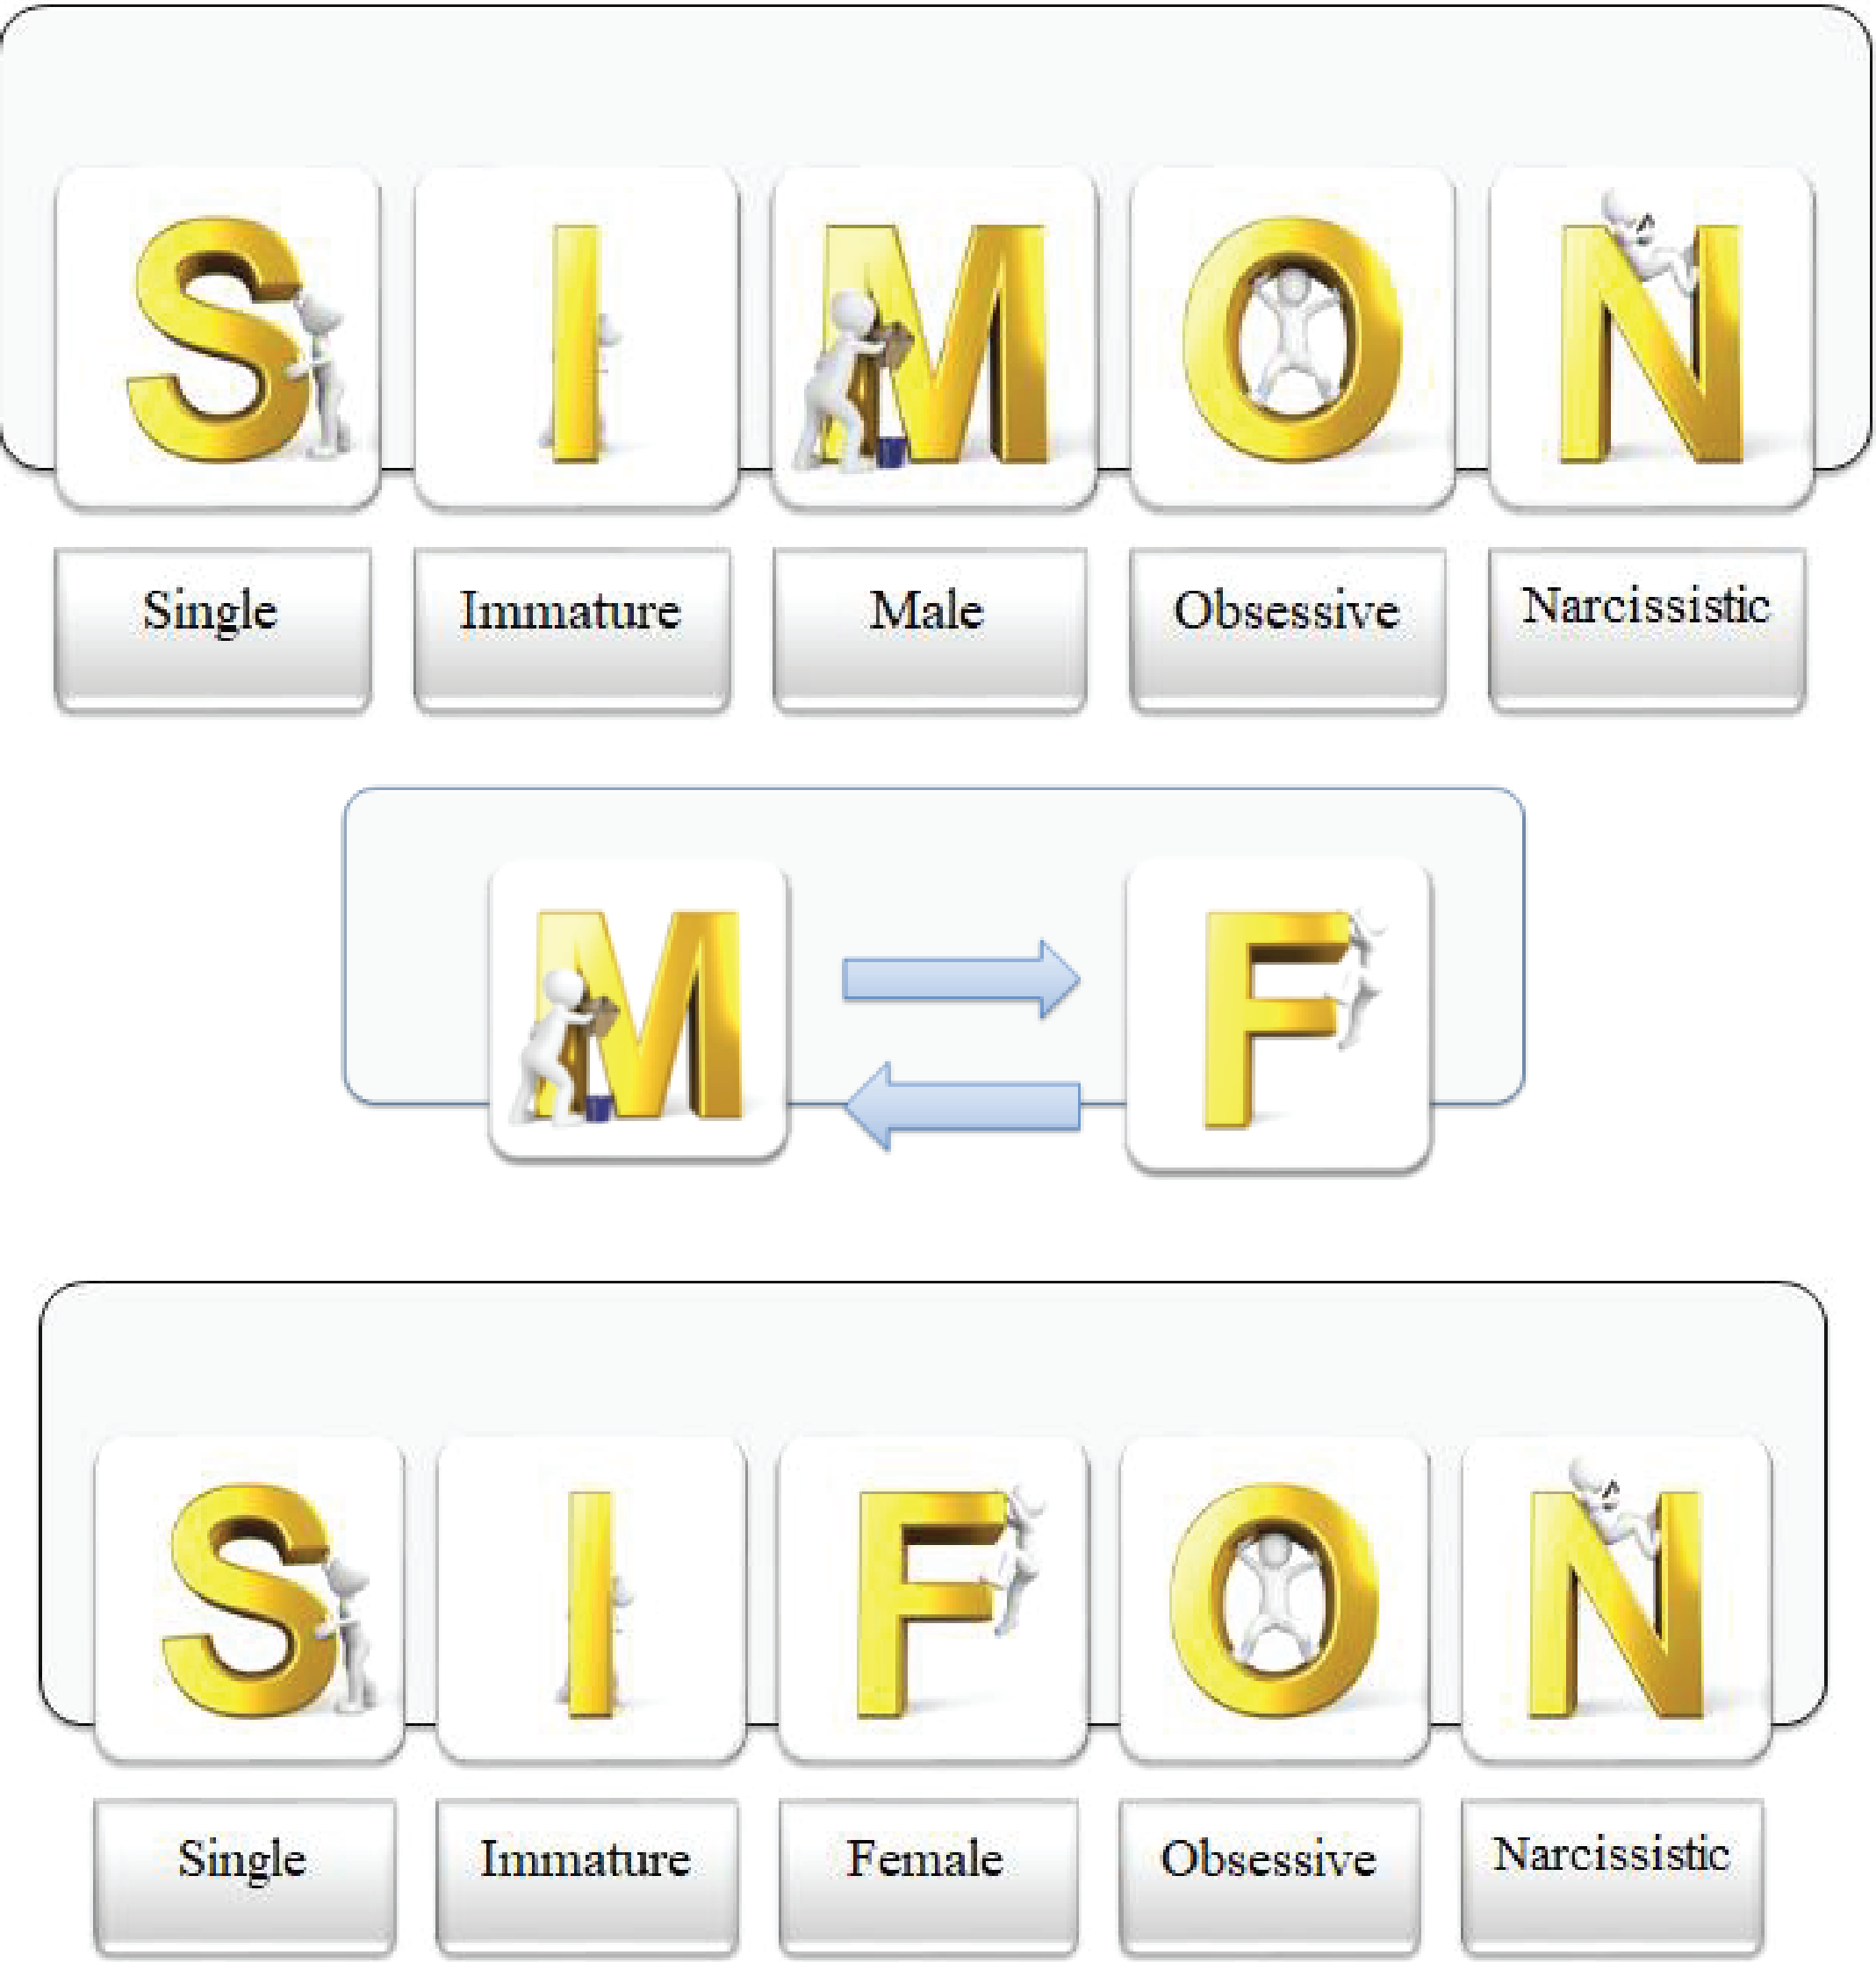

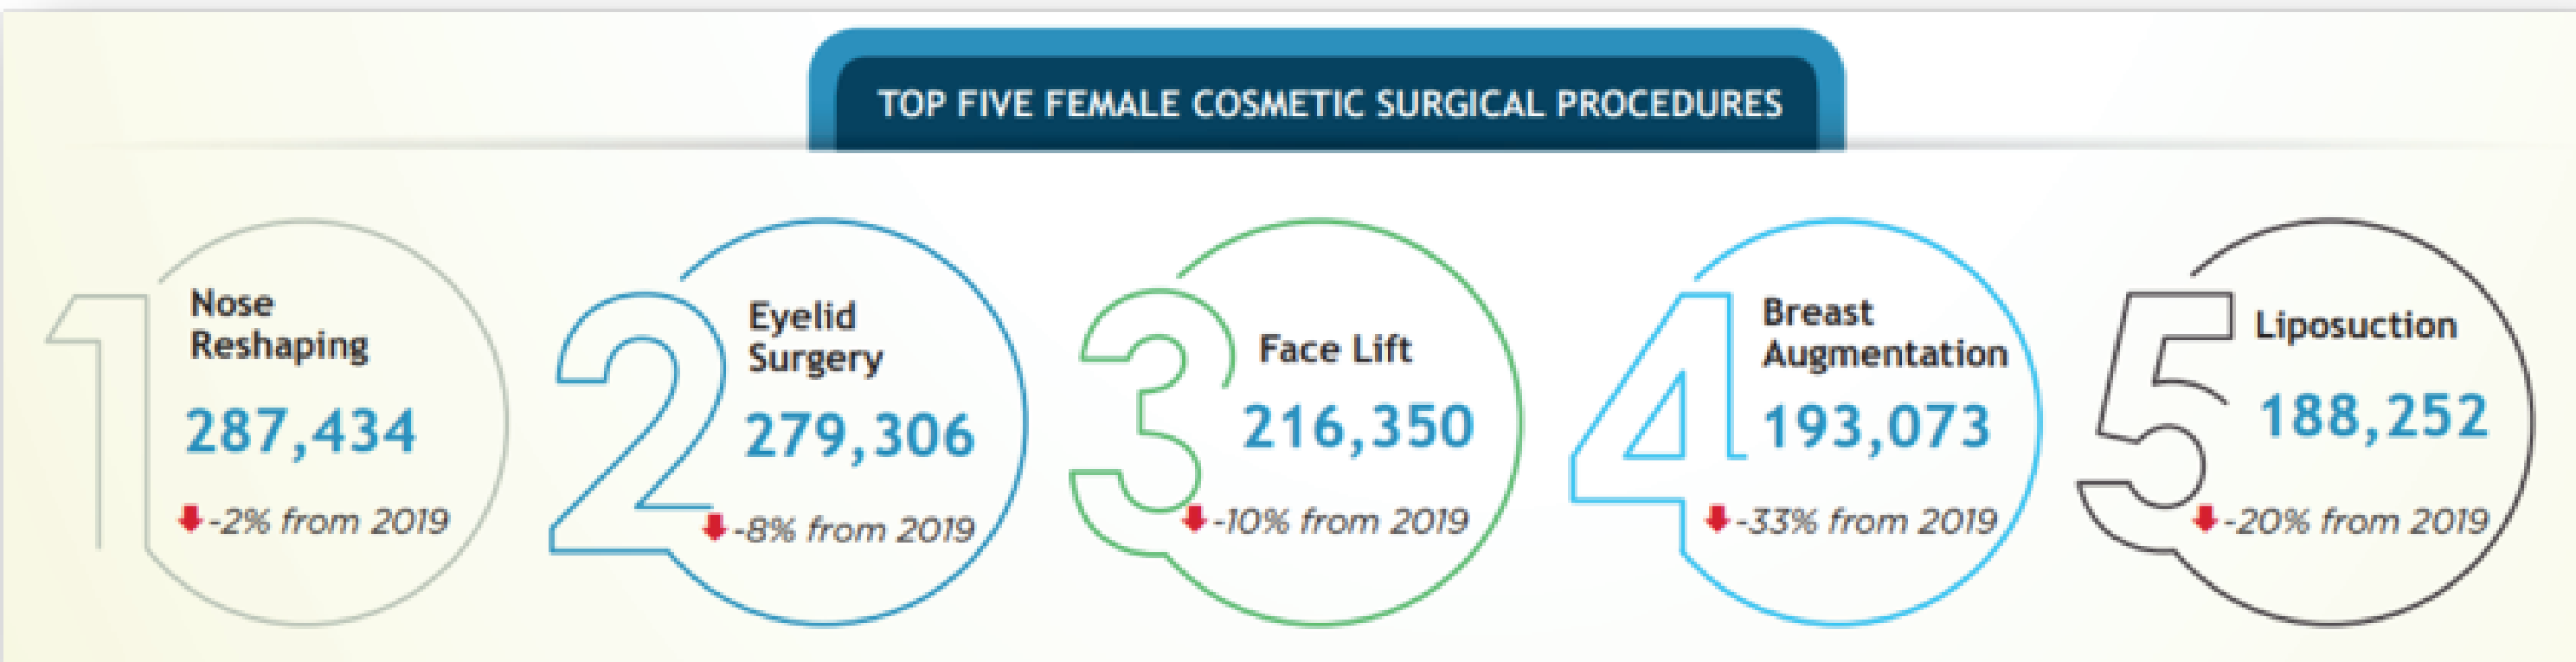

The goal of this study is to determine the frequency of personality disorders among female candidates seeking rhinoplasty and describing an equivalent term for them.

Setting; Department Of Plastic Surgery, SIMS & Surgimed Hospital Lahore

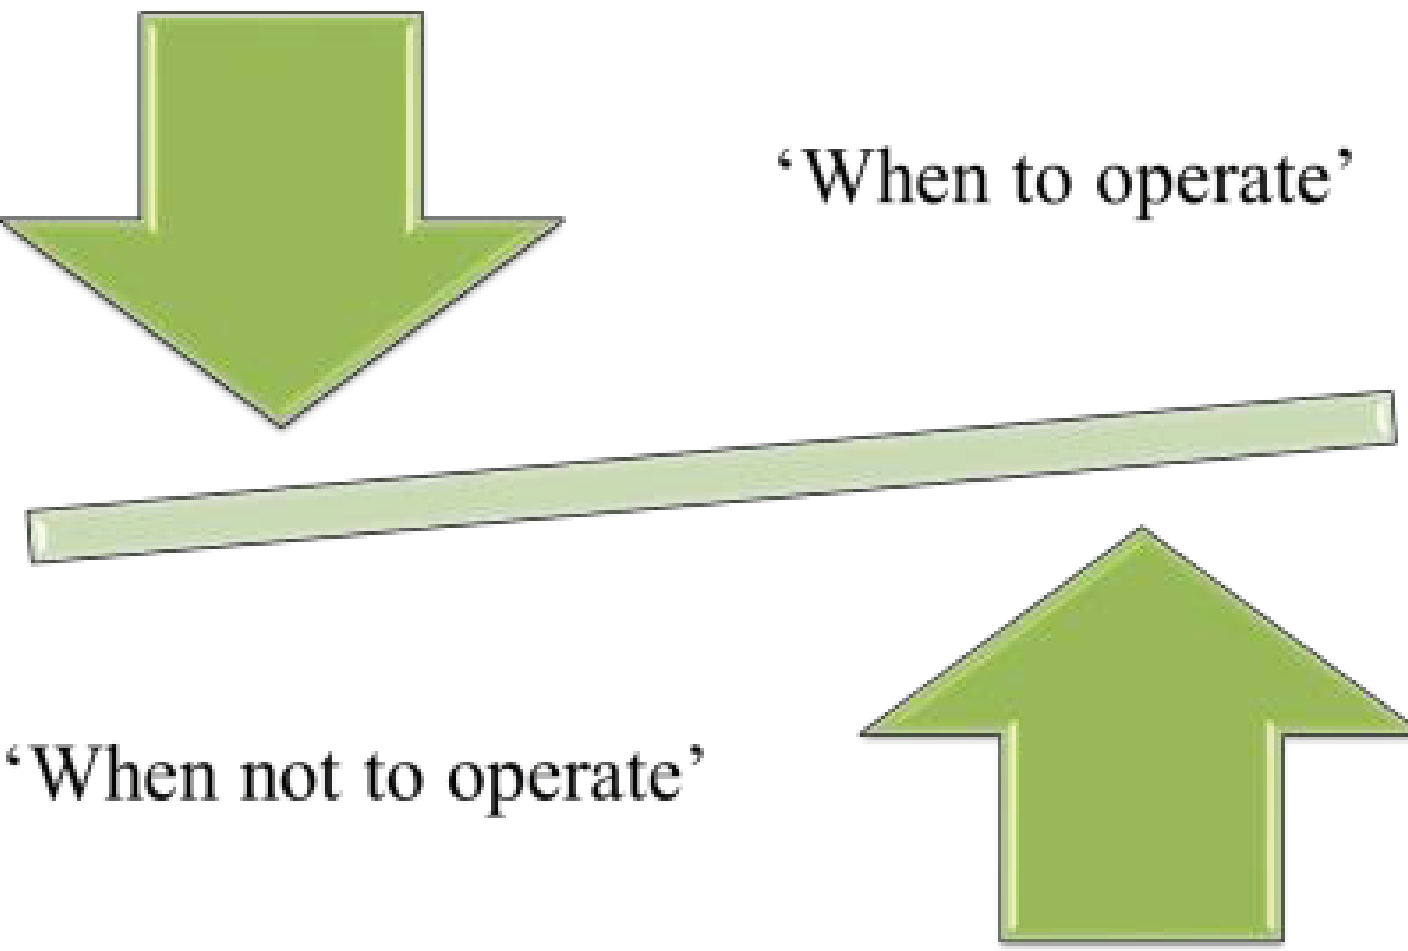

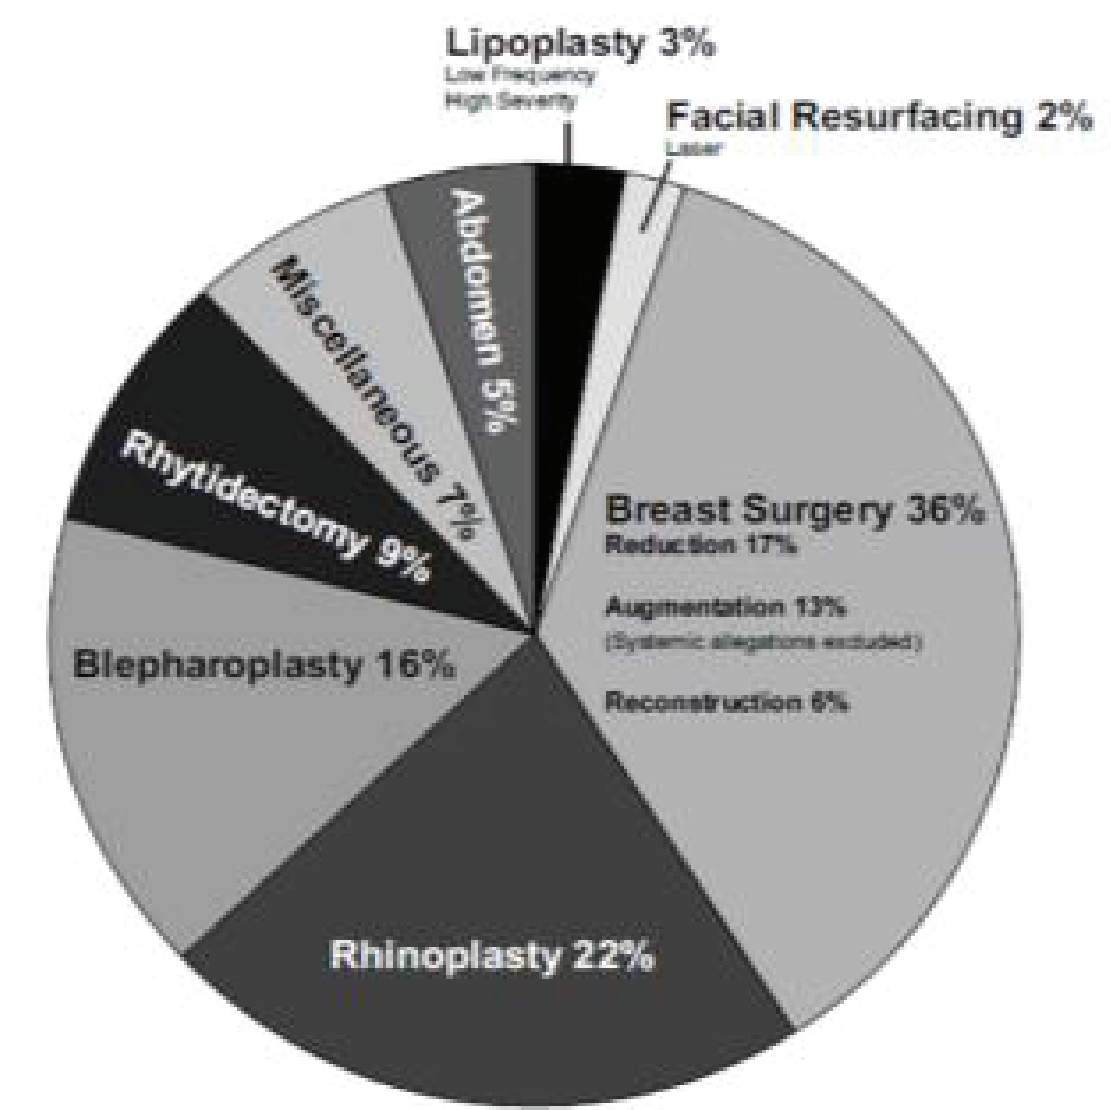

Duration; March 2018 to March 2020

Sample Size; 110 female patients

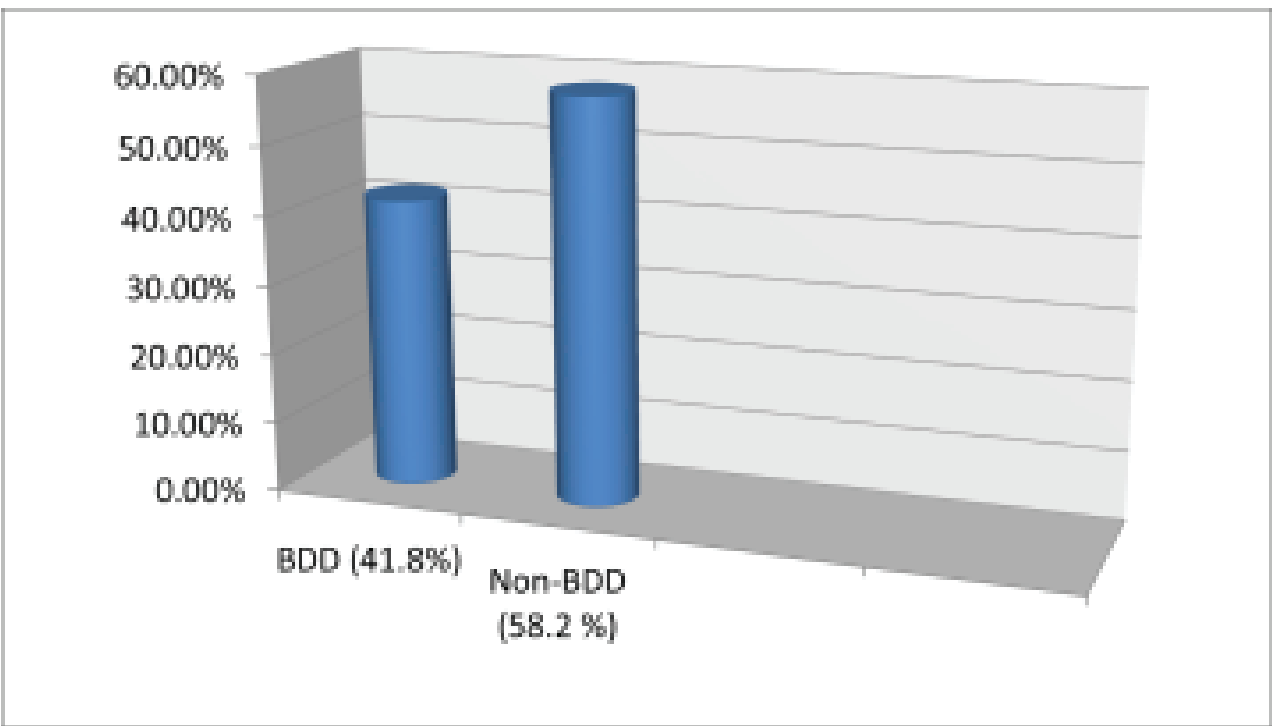

Study Design; Questionnaire based (Dysmorphic Concern Questionnaire), mixed method, qualitative study.

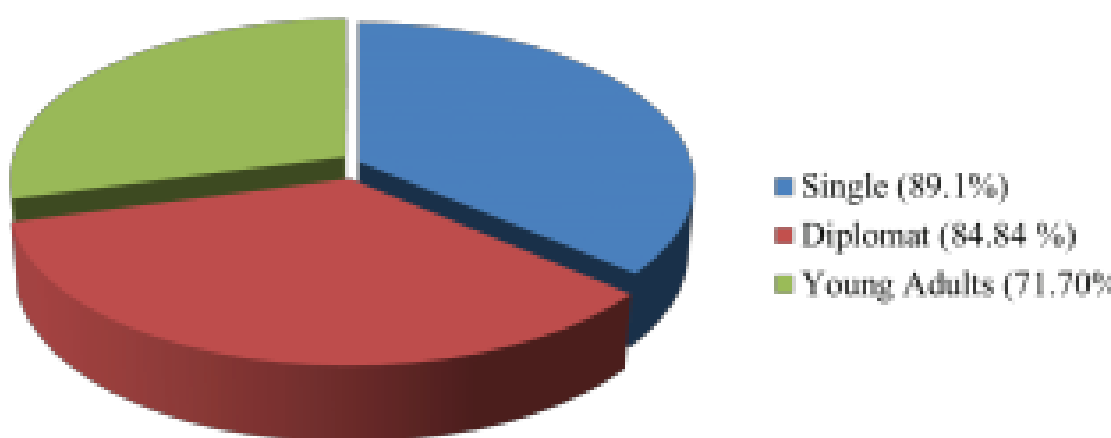

Universe of Aesthetic Claims

Results

Body Dismorphic Disorder

Conclusion:

- ✓ Maintain clear communication and rapport with the patient through good times and bad.
- ✓ Restrict your practice to those procedures with which you feel thoroughly comfortable.
- ✓ Realize that a normal temperature and a valid credit card per se are inadequate indications for elective aesthetic surgery.
