¹ USAID DISCOVER Health

Expanding a range of Health Services at Community Health Posts is Possible to achieve UHC.

BACKGROUND

Addressing Barriers to Service Access

USAID- DISCOVER – Health project with the aim of providing support to the ministry of health goal of equity in health services access, expanded the range of services available at community health post level.

This is by addressing barriers to services access related to distance, travel costs and awaiting time. The project has taken health services offered at higher health facilities to Health Posts.

METHODOLOGY

Hiring Skilled Personnel

The project hired highly qualified health care professionals to work in a hub and spoke model to offer integrated health services at outreach health posts while empowering Ministry of Health professionals with skills.

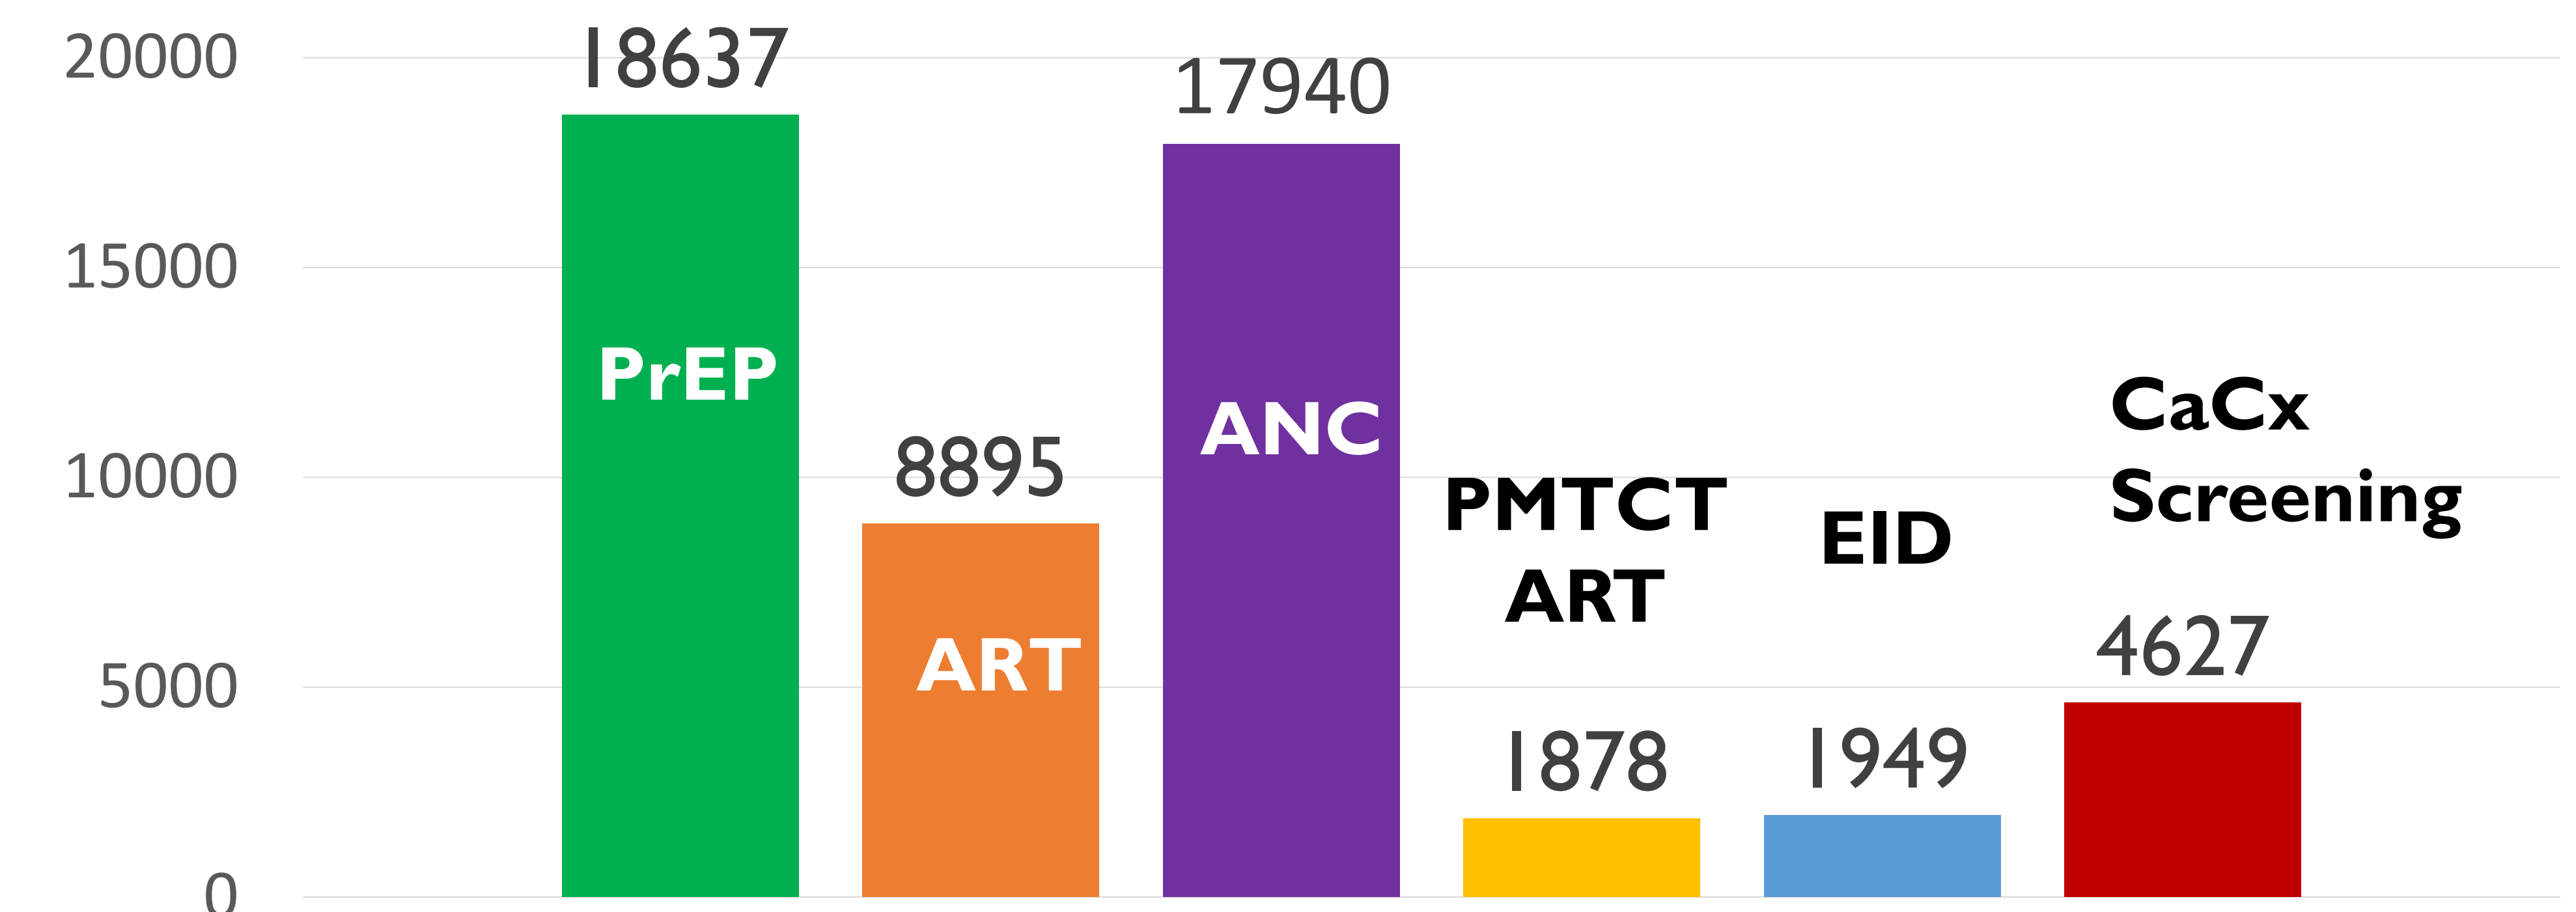

Call to Action:

How can we achieve UHC in one word?

Your feedback please!!

RESULTS

Accessed Services at 14 Health Posts from 2017 to 2023

CONCLUSION

Expanding Integrated Health Services at Health Posts

Expanding quality integrated primary healthcare services at health posts with skilled personnel promotes equitable and cost-effective health services accessed by communities, leading to achievement of UHC in low-income settings.
