Introduction:

Patients' safety issues have always been the most important thing for medical staff. Regardless of the medical staff of patients, or medical staff who supported after post -defense, everyone puts the "patient safety" in their hearts. In the pathological department, pathological tissue specimen is as important as patients. Therefore, use TRM techniques to improve the process from receipt of pathological tissue specimens to report completion.

According to the Ministry of Health and Welfare, Taiwan Patient Safety Information Network Disease Safety Reporting Network, Taiwan Patient Safety Reporting System Annual Report 2020-21.

Distribution of various types of medical examinations in hospital inspection patient safety reporting events

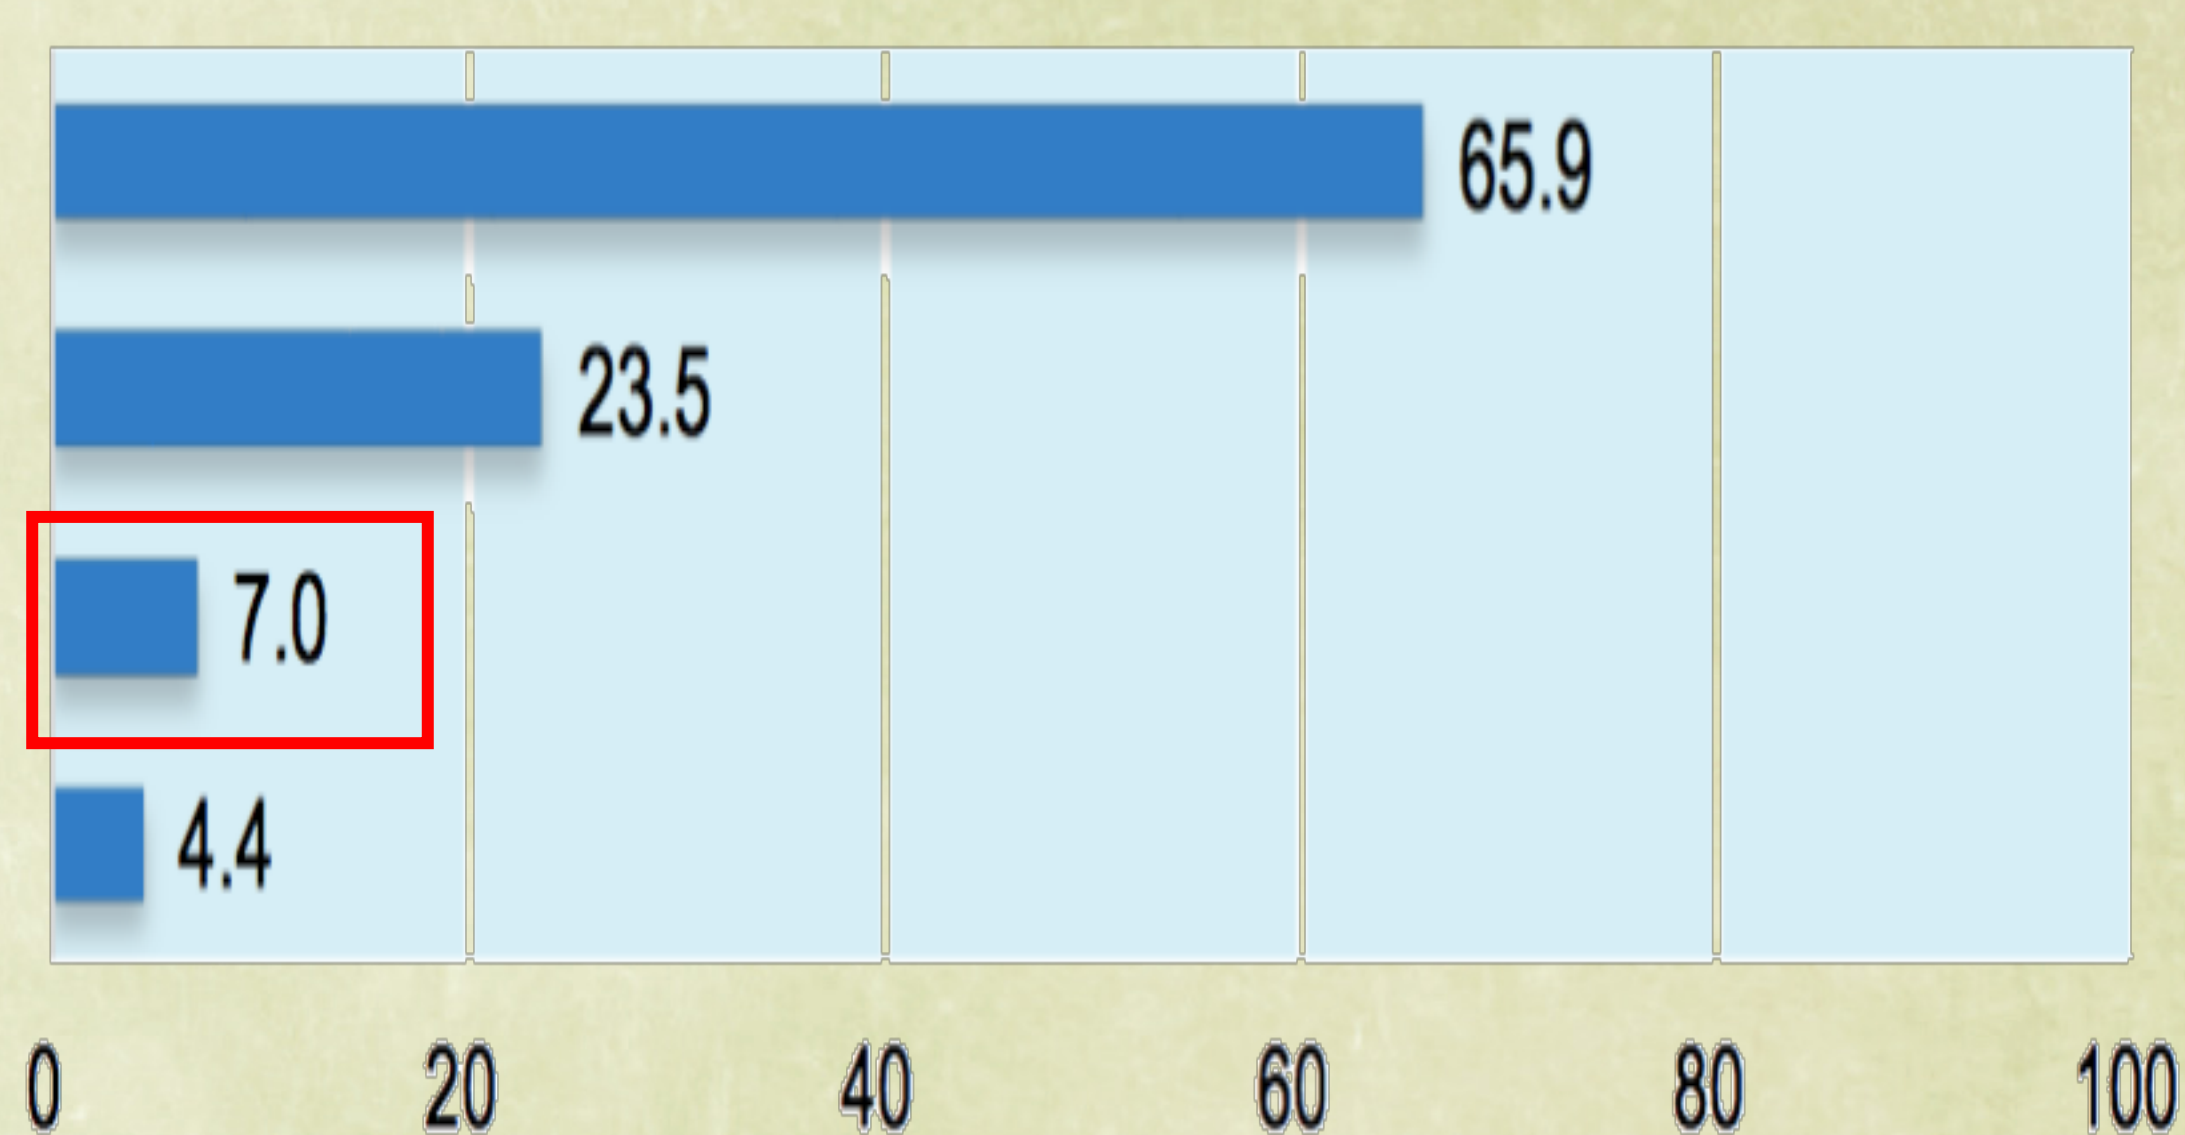

Fig.1 TPR event in 2020 (N=5713)

laboratory medical tests
radiological exam.
Cells/pathological sections
clinical physiological exam.

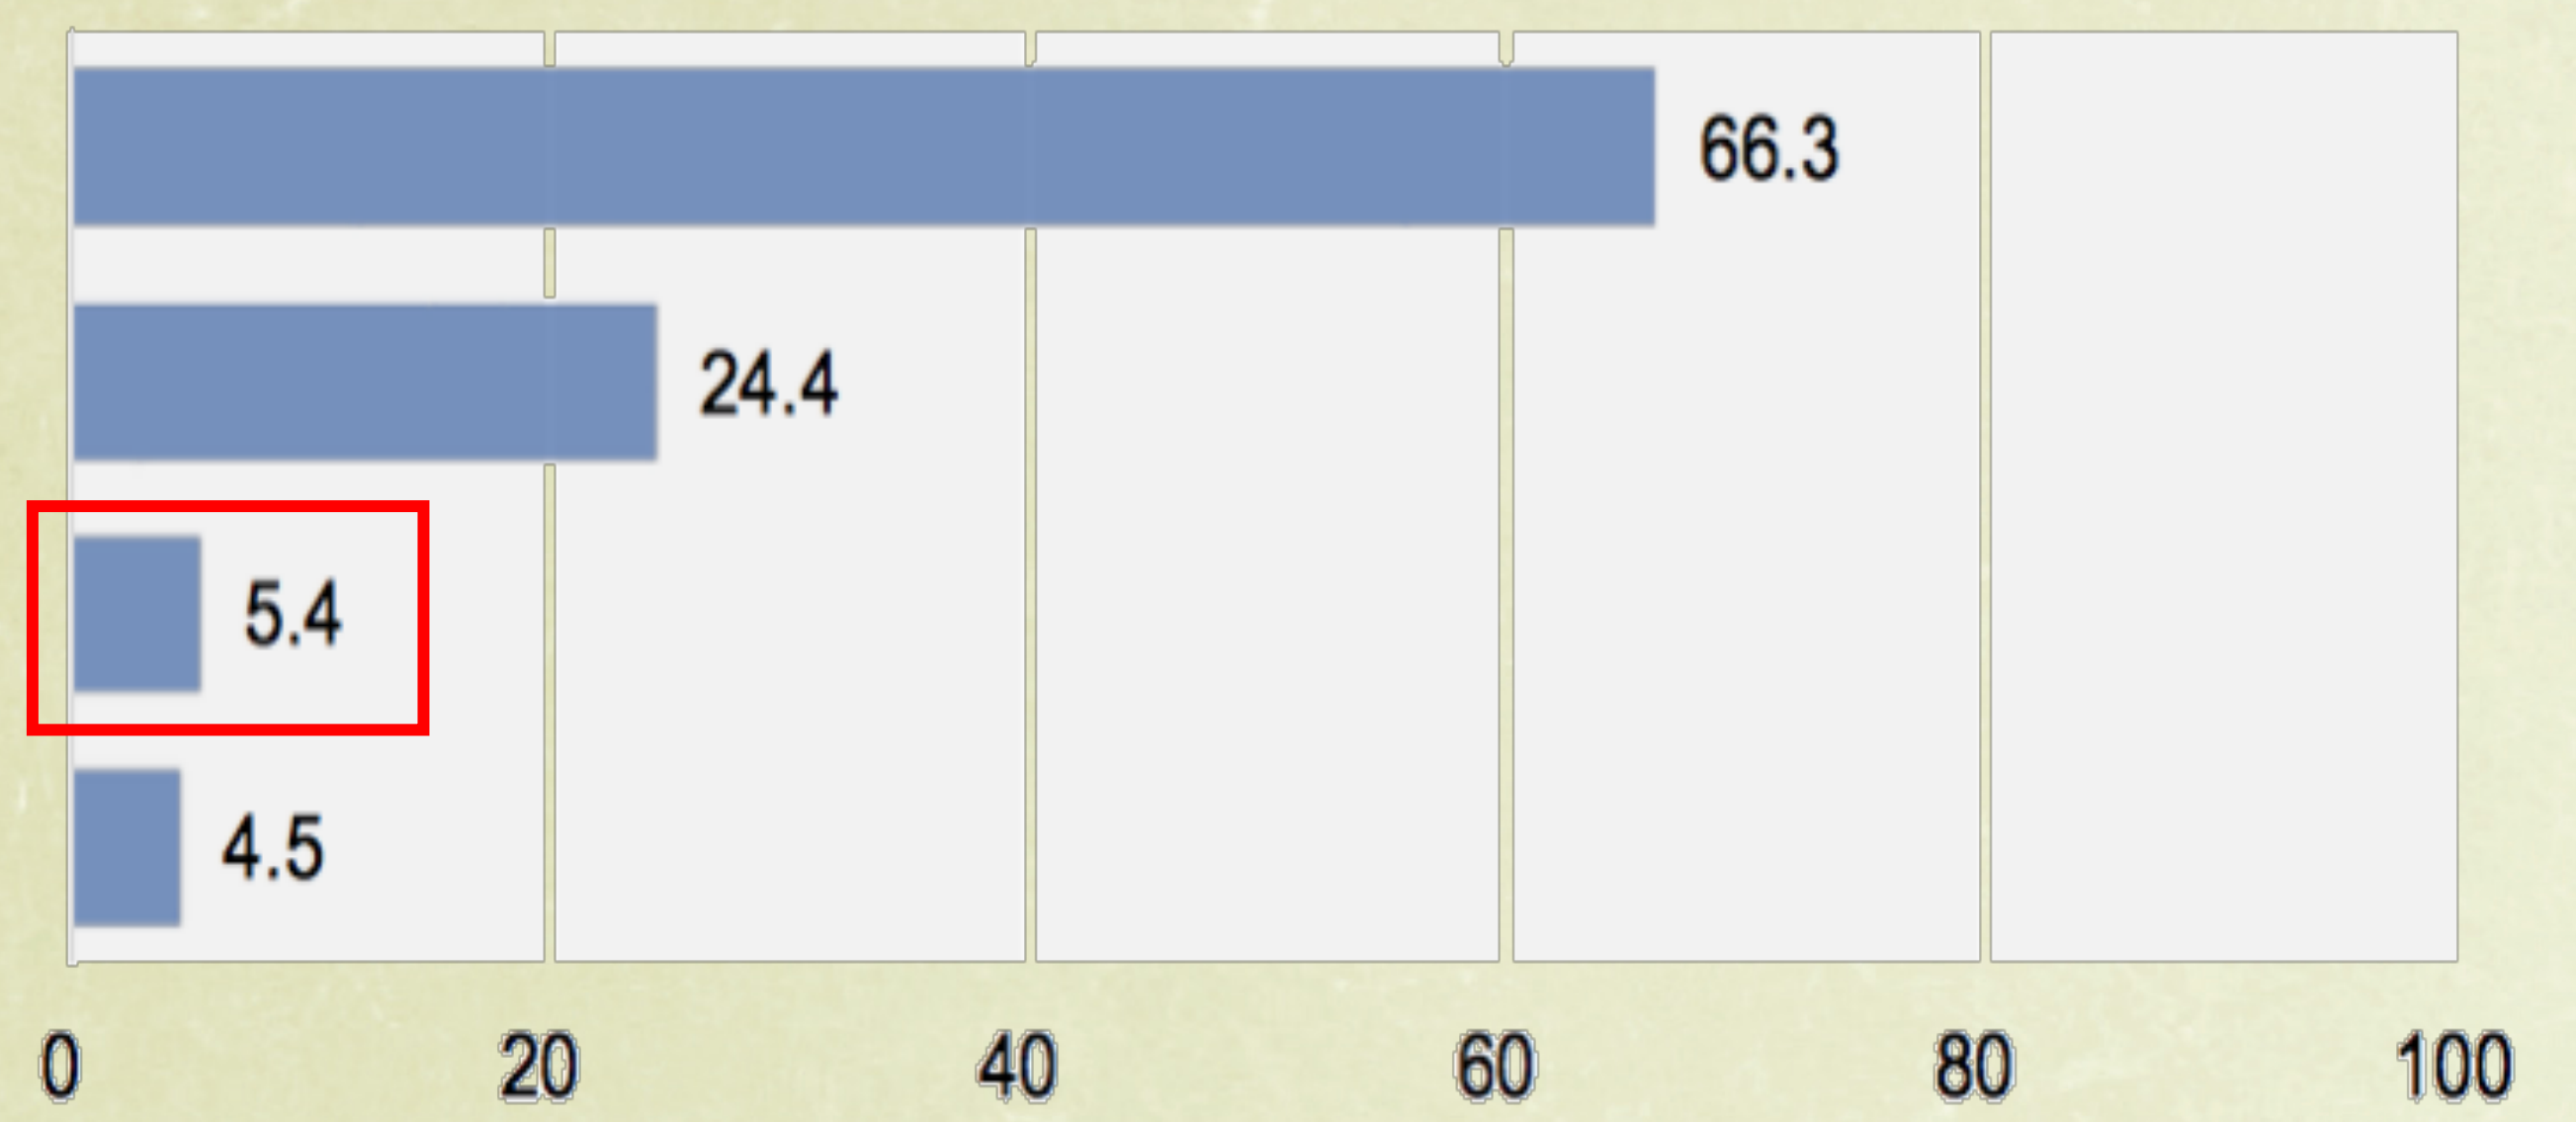

Fig.2 TPR event in 2021 (N=4650)

Cross-analysis of hospital inspection/examination/pathological biopsy incidents between medical inspection types and the impact on patient safety and health

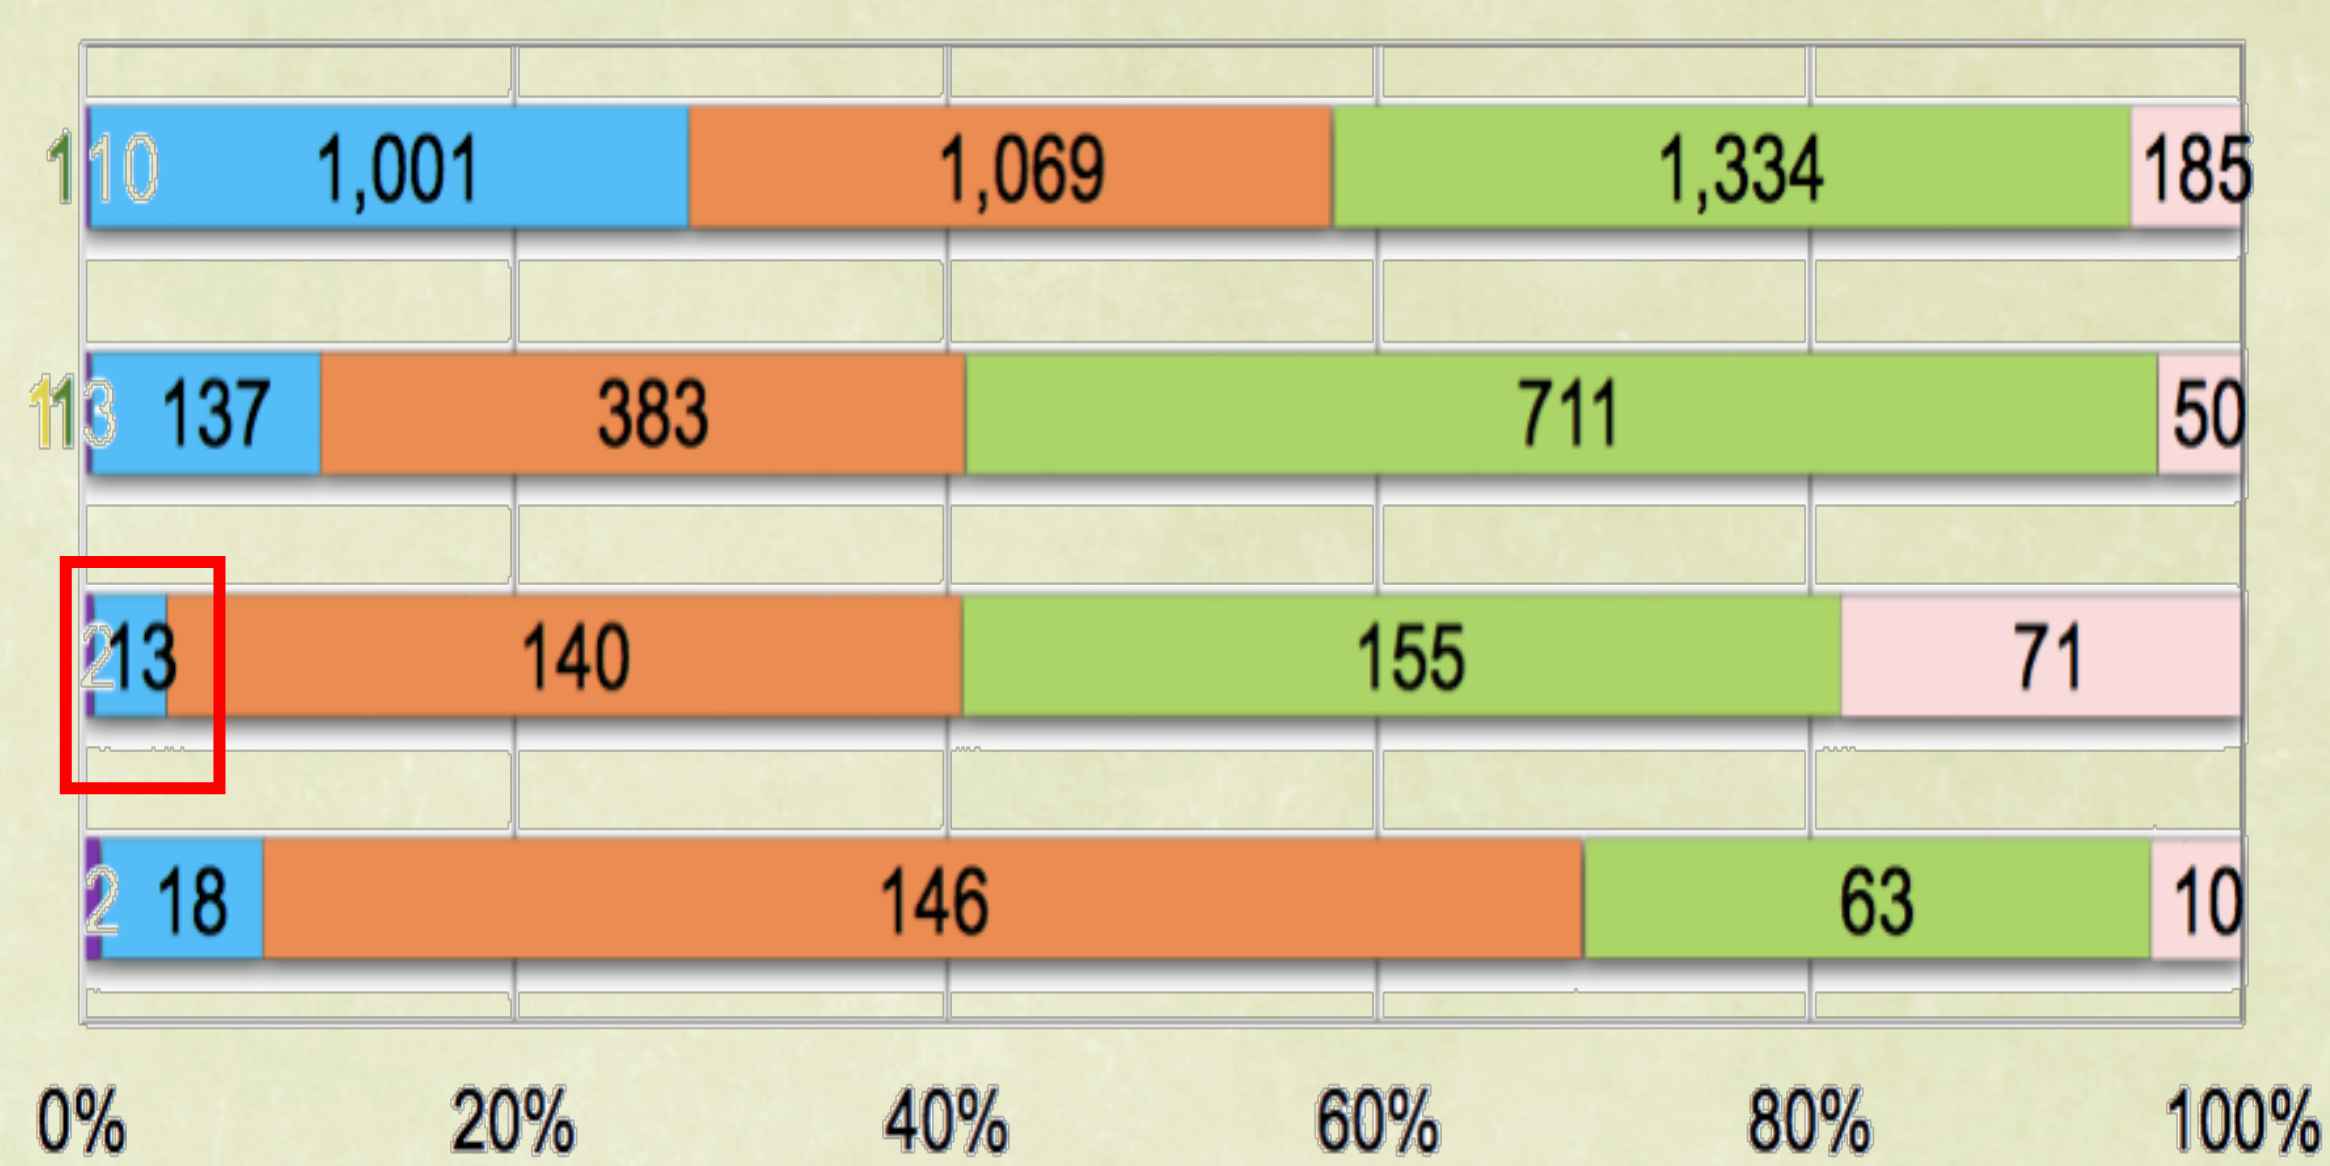

Fig.3 in 2020 ■ die ■ Extremely severe ■ severe ■ Moderate ■ Mild ■ no harm ■ nearly missed ■ Unable to judge (N=5643)

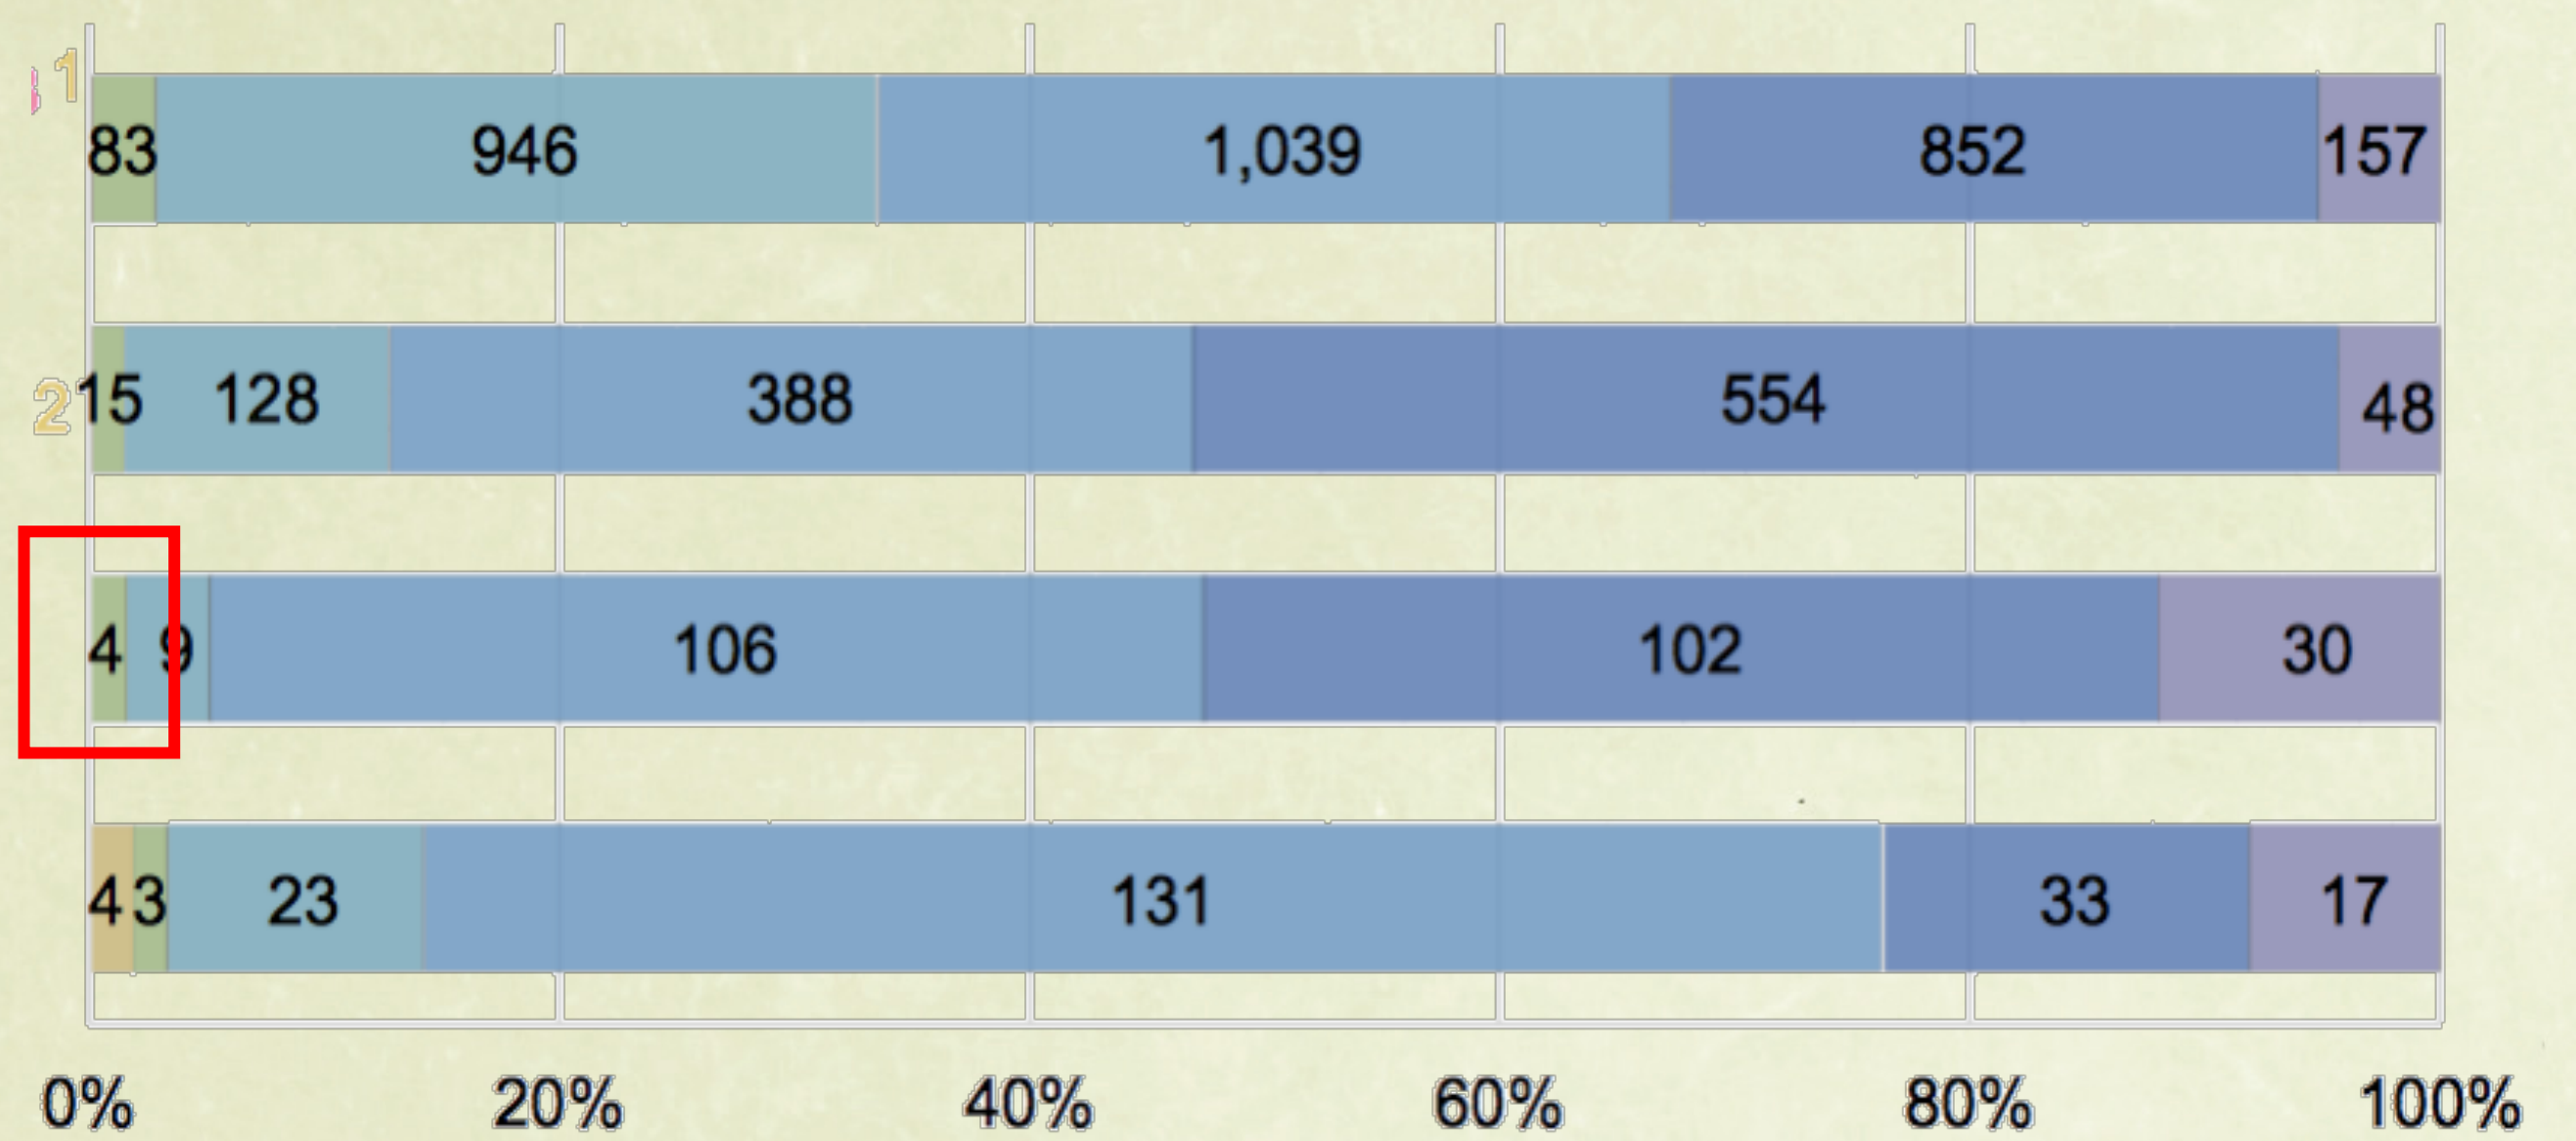

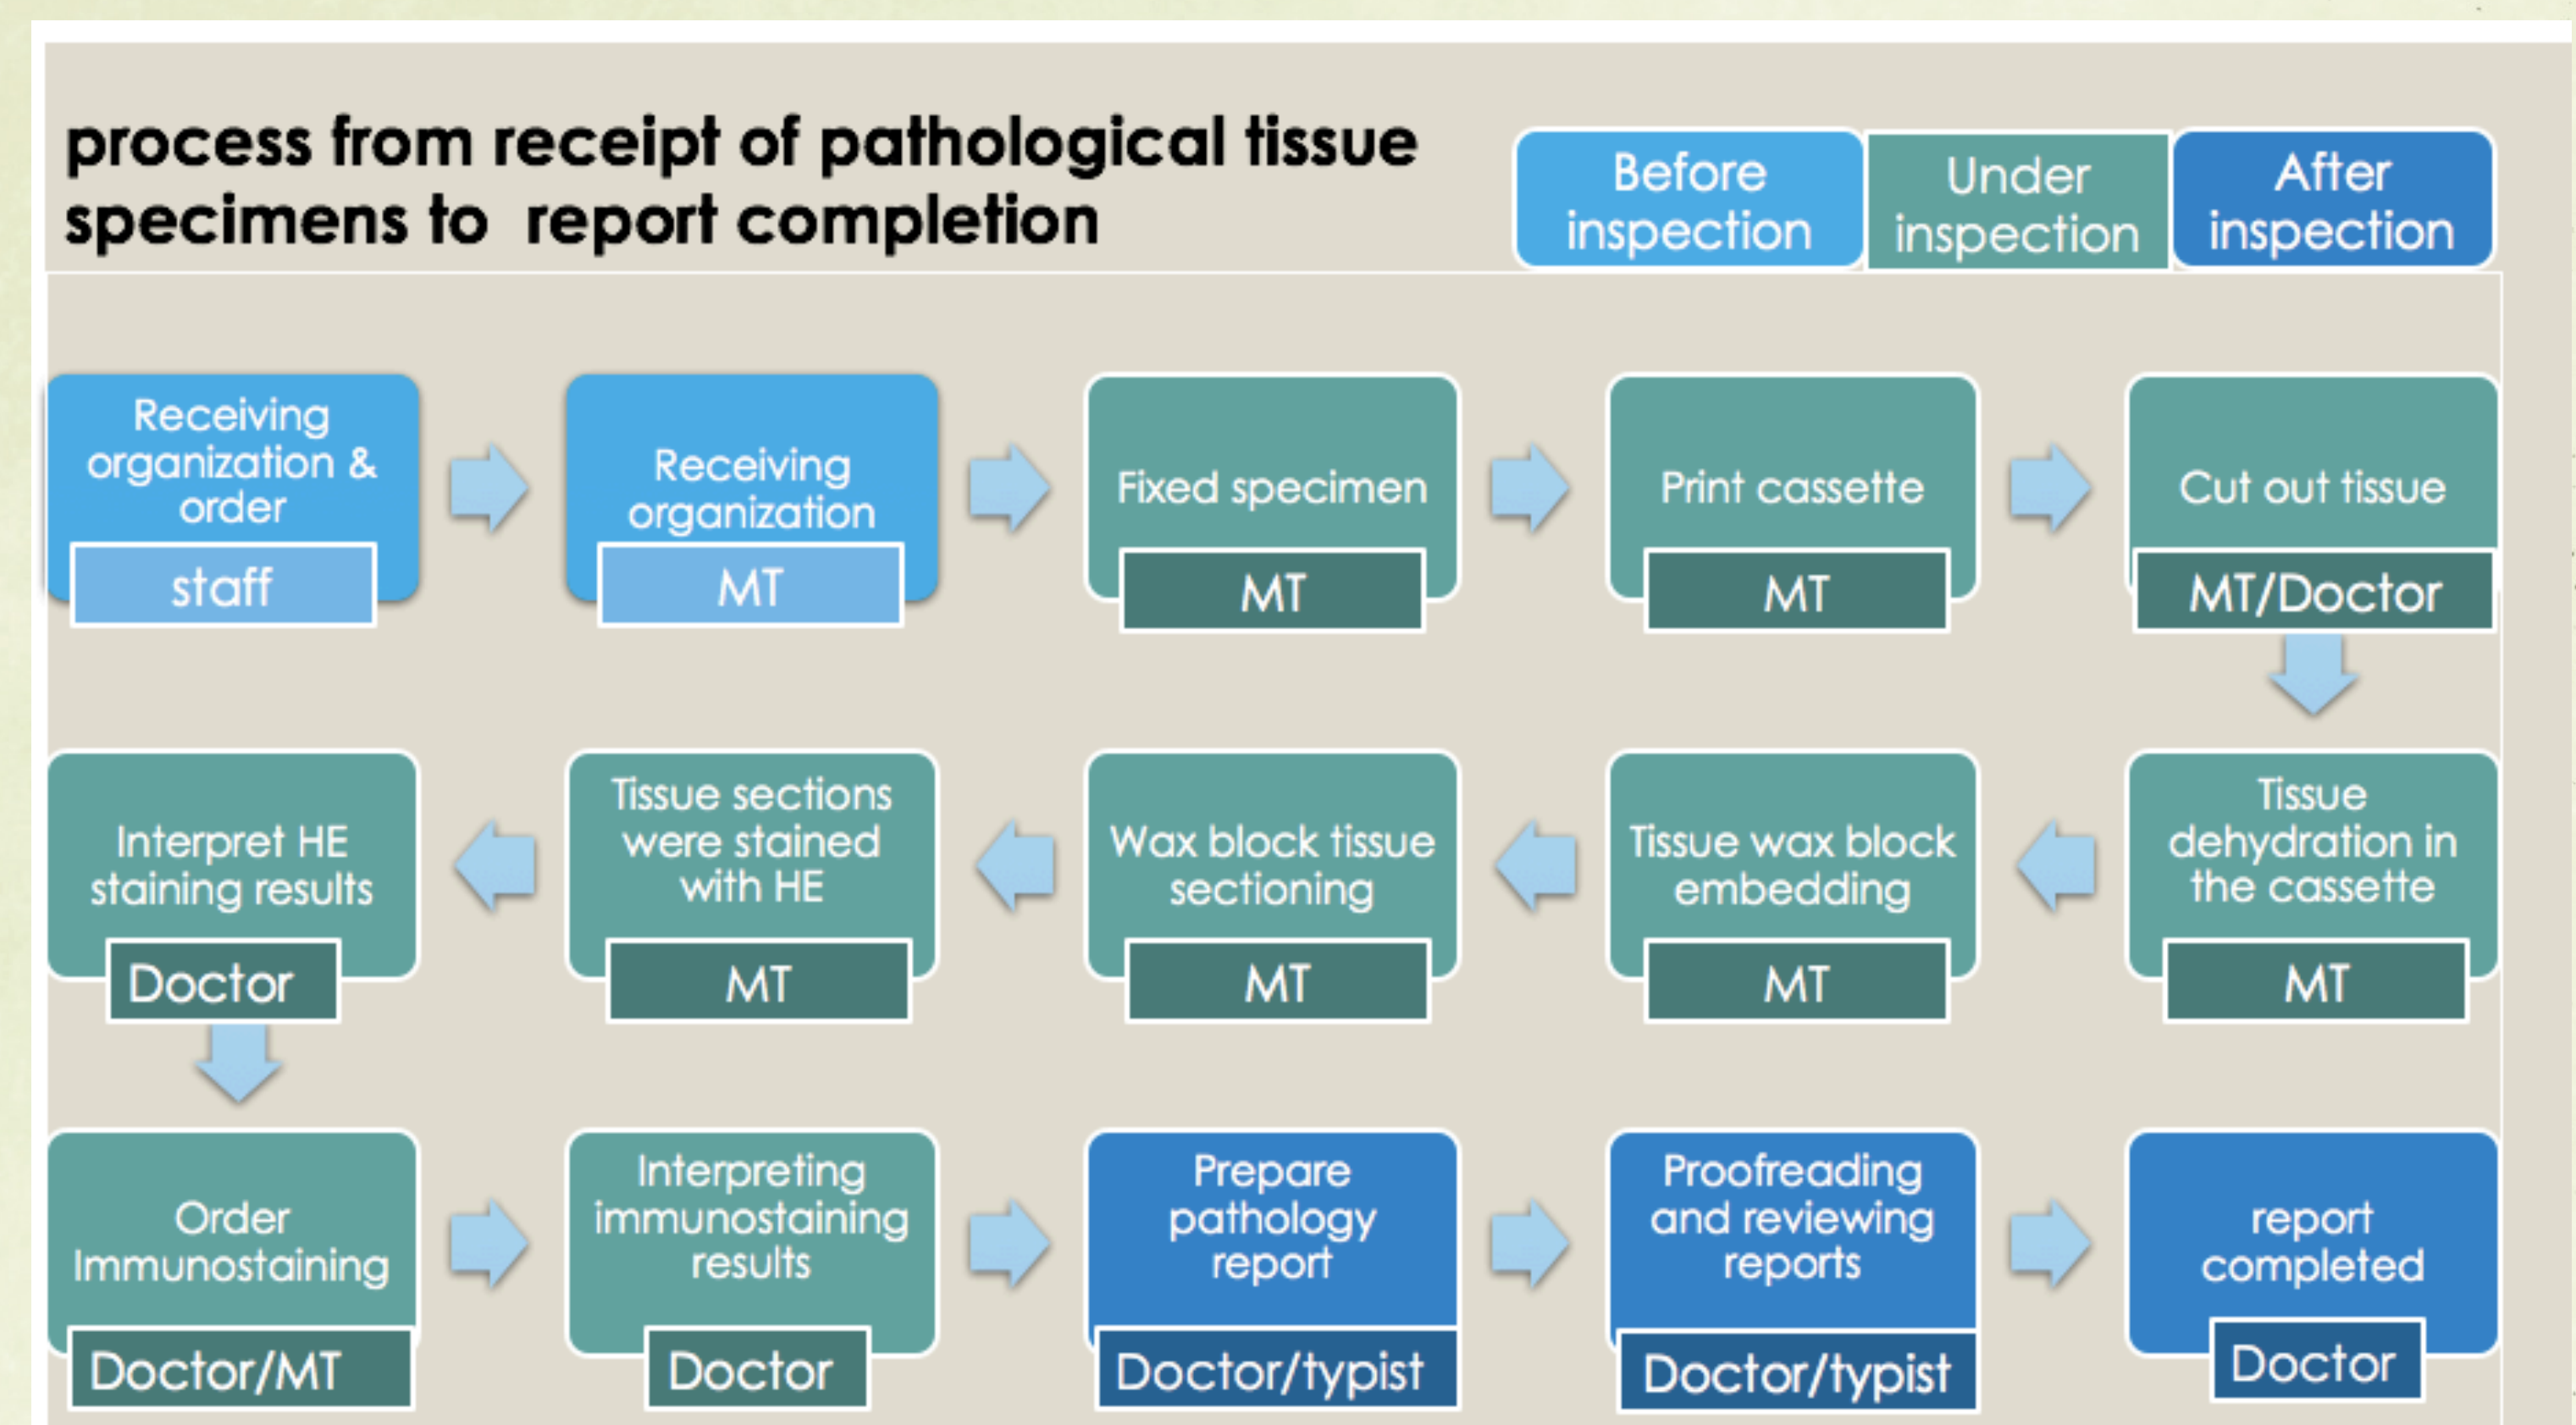

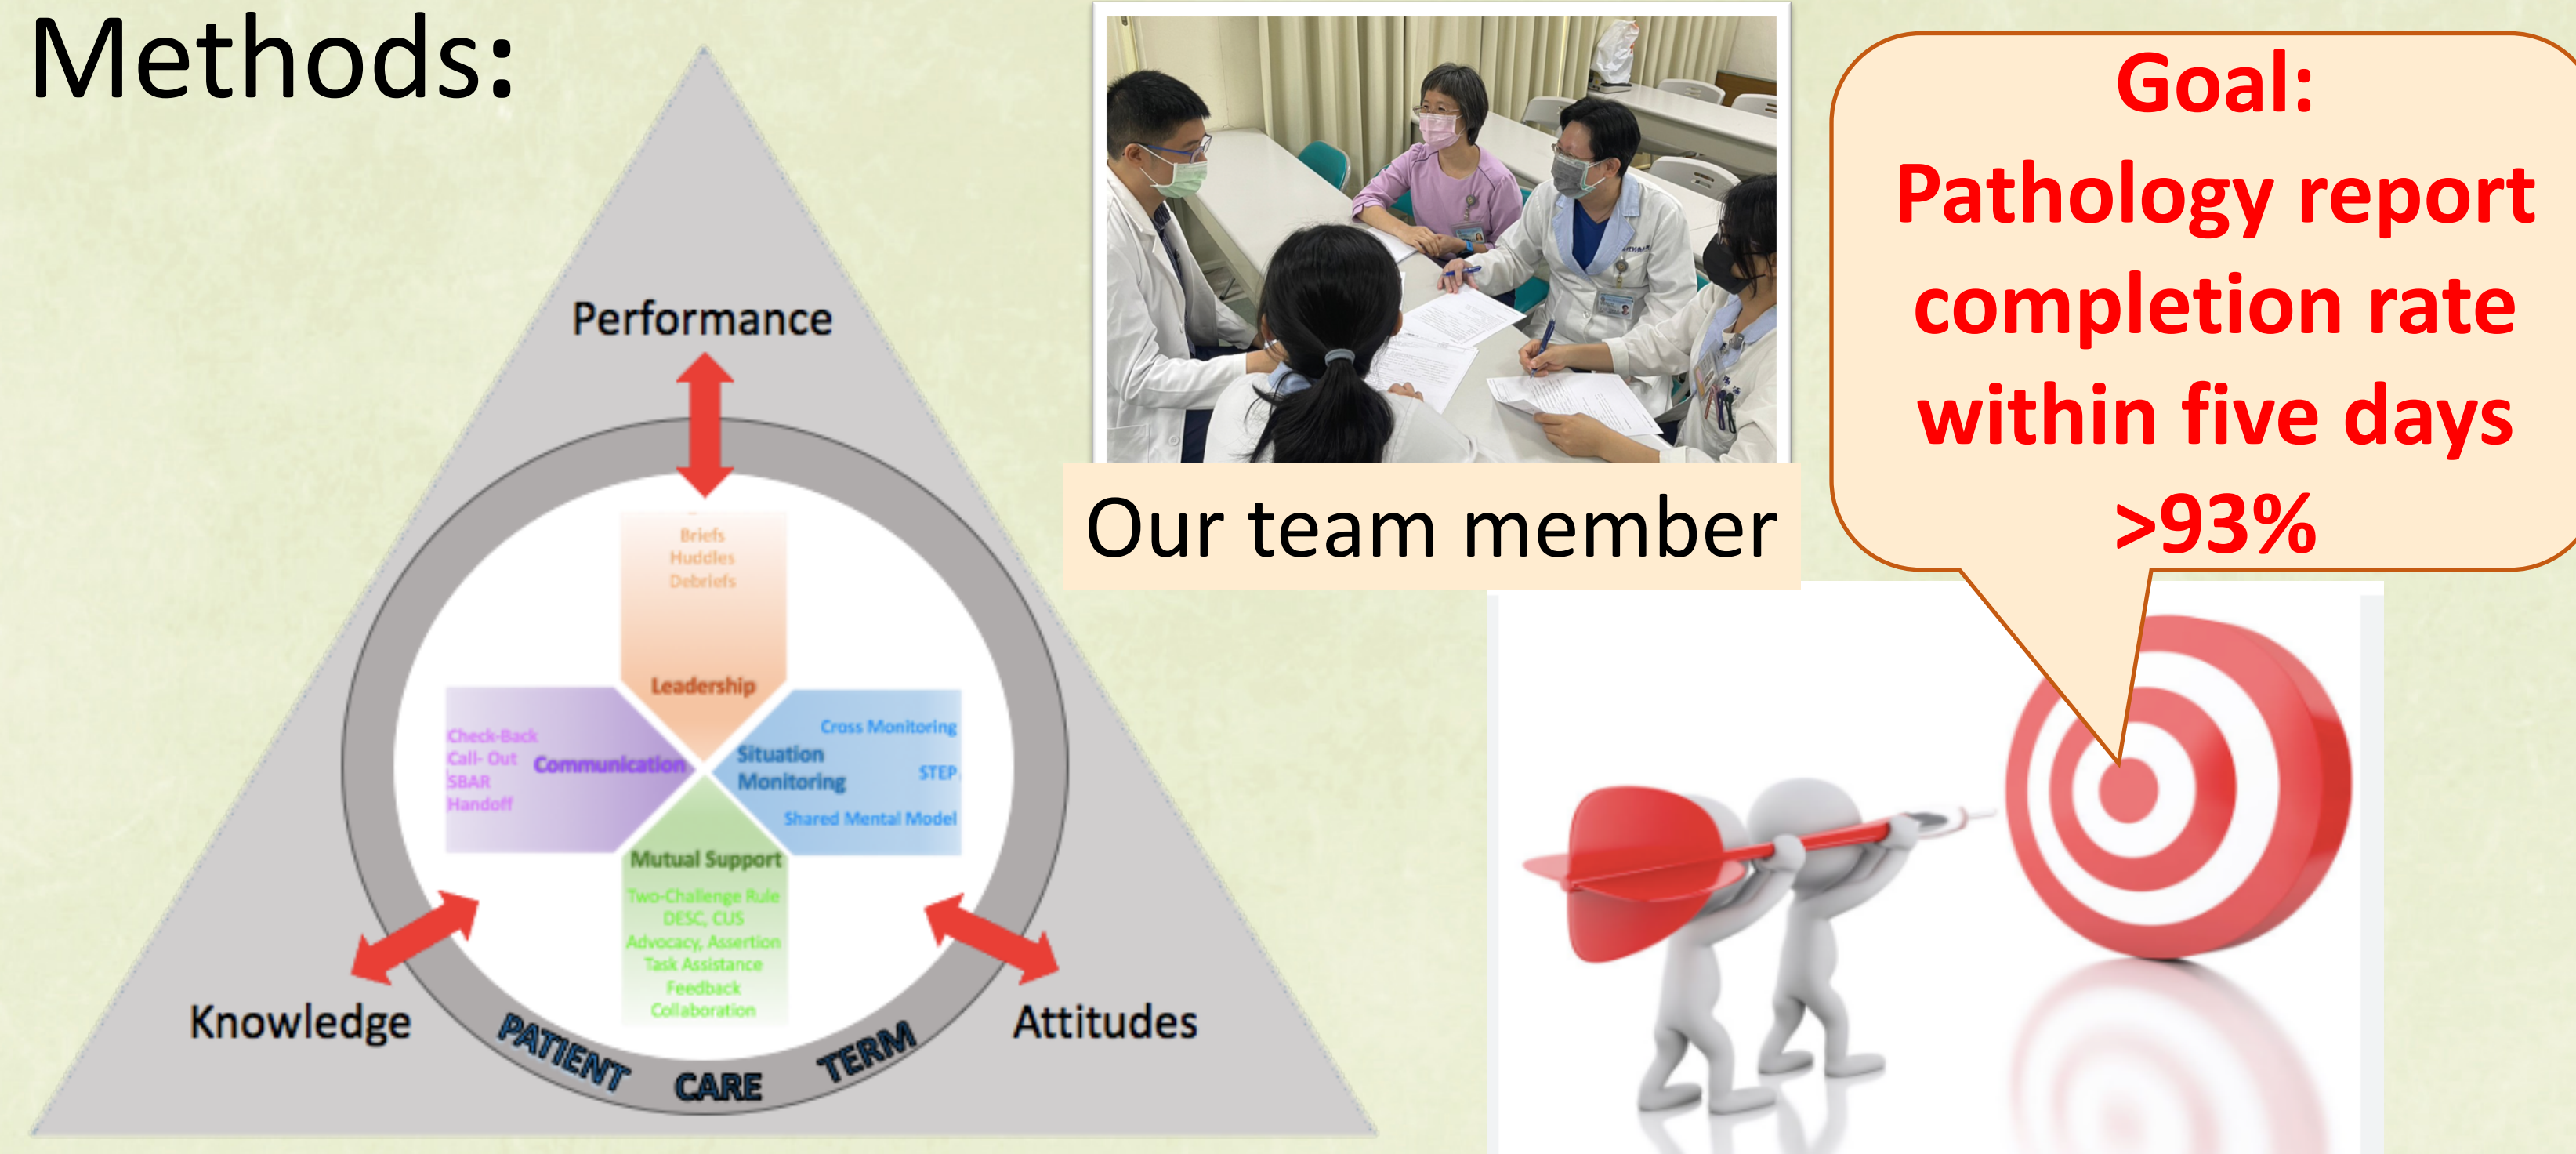

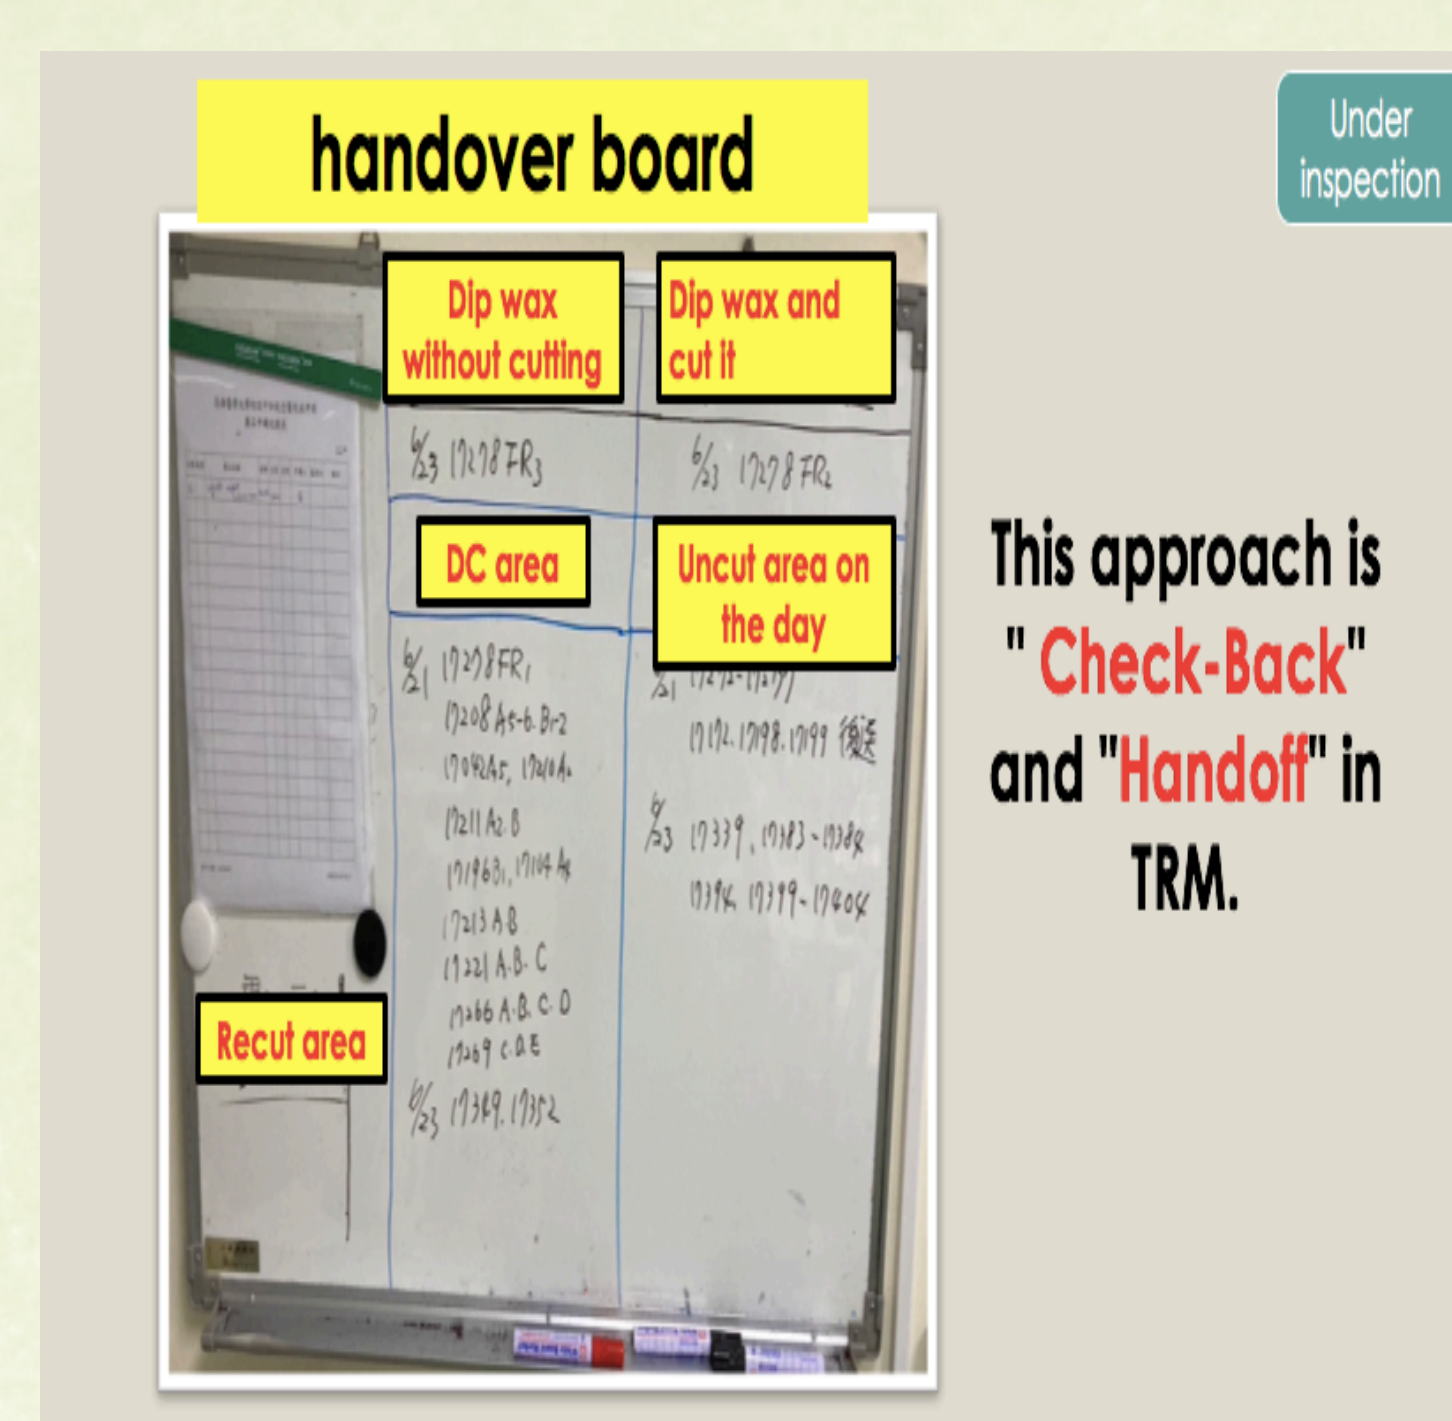

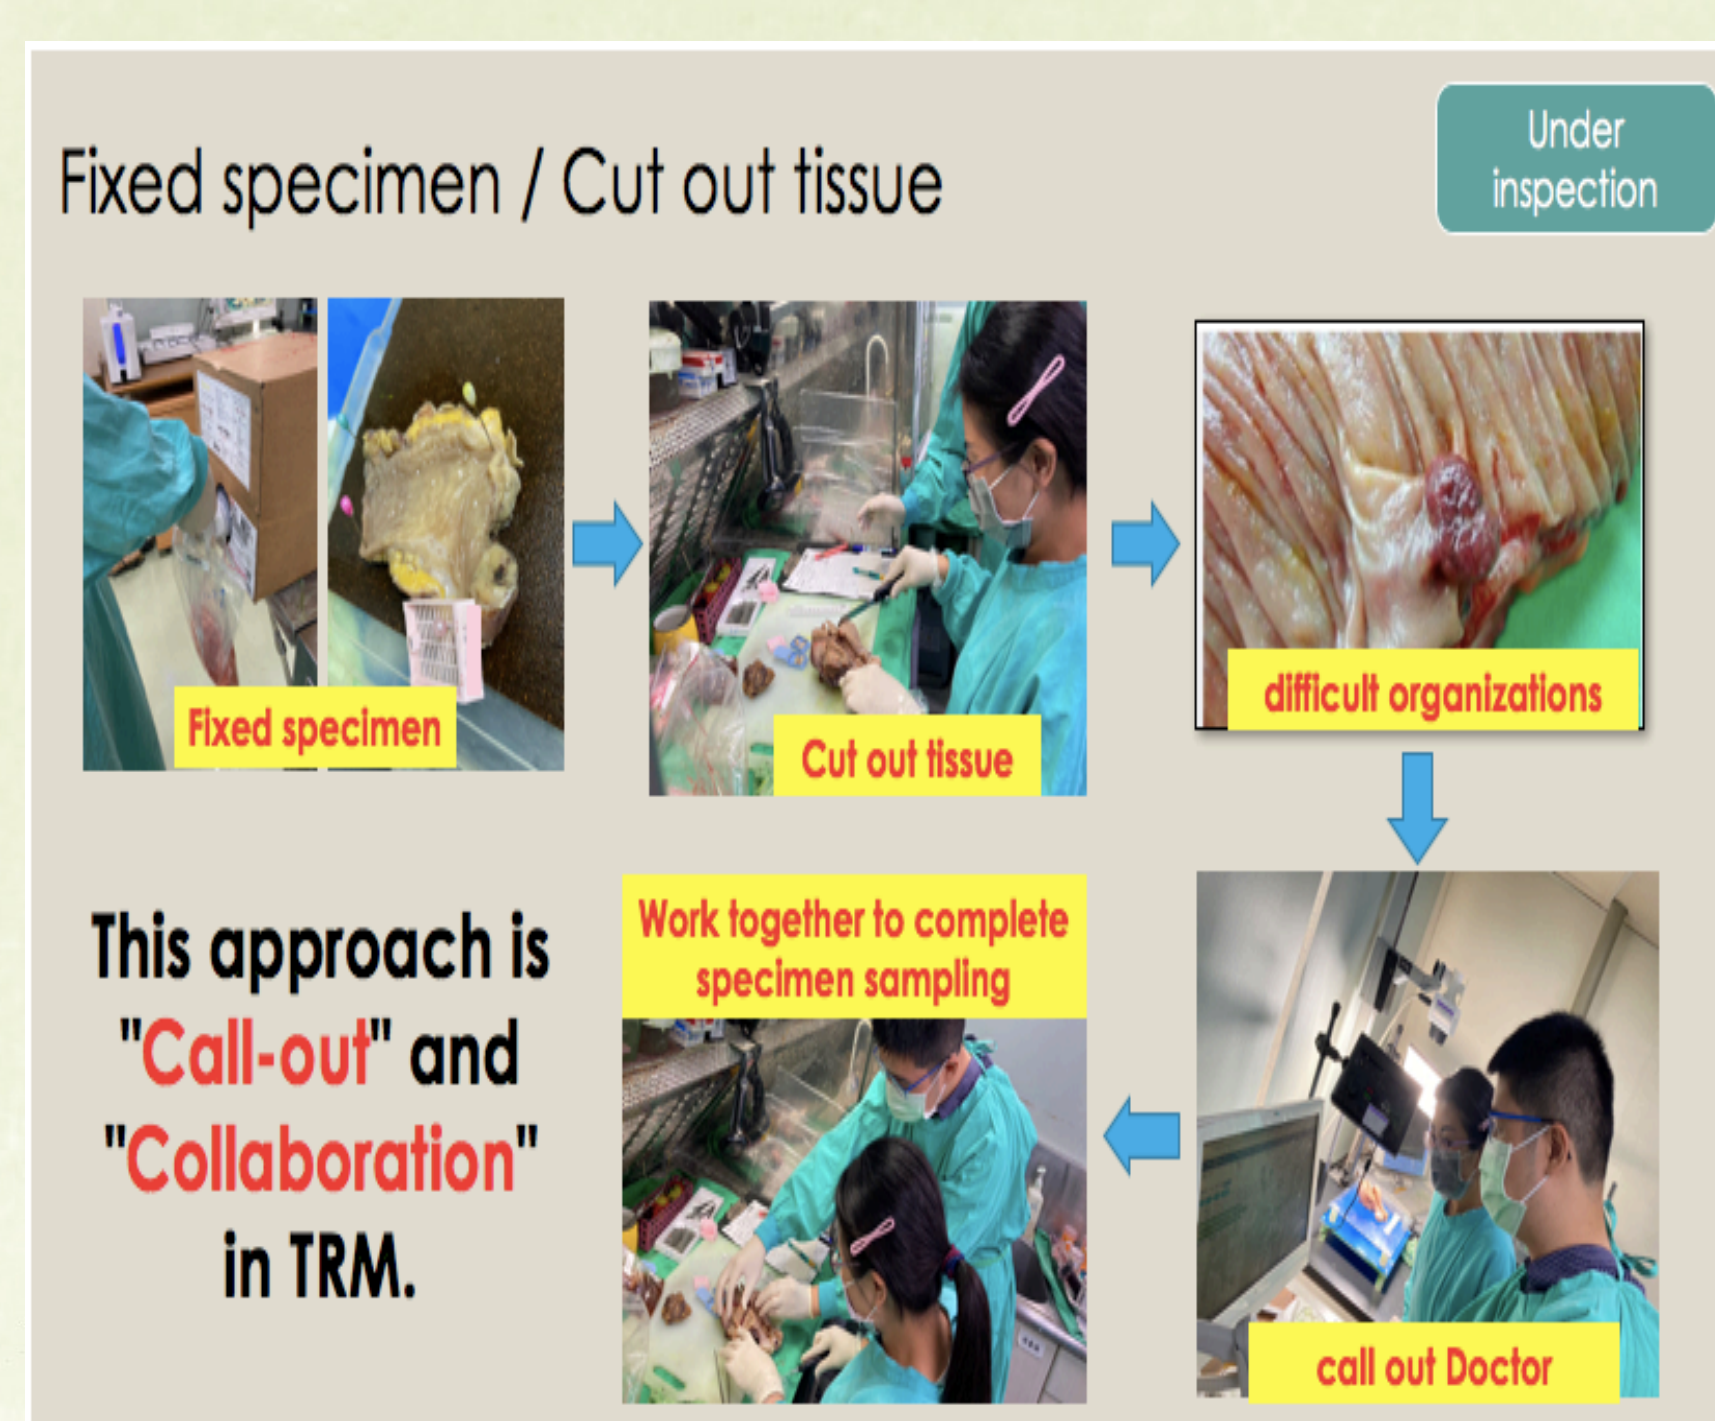

Fig.4 in 2021 ■ Extremely severe ■ severe ■ Moderate ■ Mild ■ no harm ■ nearly missed ■ Unable to judge (N=4650)

Methods:

Result:

Pathology report completion rate within five days In 2023
