

Care of patients for planned surgery

Jacqueline Toombs Perioperative Diabetes Specialist Nurse. Cath Robinson lead Anaesthetist for perioperative diabetes and IP3D project at MFT.

Professor Gerry Rayman Consultant Diabetologist and Emma Page with the GIRFT, IP3D project and Jonathan Schofield, Clinical Lead for Diabetes, Endocrinology and Metabolism at MFT

Introduction

People with diabetes have higher morbidity & mortality, & longer hospital stays compared to those without

- The Improving the Perioperative Pathways of People with Diabetes (IP3D) programme is changing this

16% of beds occupied by people with diabetes (30% of all inpatients at Manchester Royal Infirmary)

- Once staff were educated they felt more confident in caring for patients with diabetes and patients received better care
