

GeNotes

An Education Tool at Your Fingertips for the New Genomics Era

AUTHORS

Dr. Jessica Woods, Genomics Fellow, Leeds Teaching Hospital NHS Trust, Dr. Abigail Hyland, Genomics Fellow, Leeds Teaching Hospital NHS Trust, Donna Kirwan, Genomics Lead Midwife, Nursing and Midwifery Genomics Team, NHS England
Prof. Kate Tatton-Brown, Clinical Director of the Genomics Education Programme, Health Education England, Dr. Amy Frost, Education Specialist, Genomics Education Programme, Health Education England, Dr. Kelly Cohen, Consultant in Obstetrics and Fetal Medicine, Leeds Teaching Hospitals NHS Trust

Key features

- Online resource
- “Just in Time” information - education at the point of need
- Two tiers
 - Tier 1 ‘In the Clinic’
 - Tier 2 ‘Knowledge Hub’
- Underpinned by robust governance

‘In the Clinic’

- Just in time element
- 2 types of ‘In the Clinic’ resource:
 - To support the requesting of genomic investigations
 - To support result delivery
- Resources are:
 - Aligned to the National Genomic Test Directory
 - Written to a strict template so that individuals familiar with the resource can easily locate the information
 - Specialty specific
 - Contain “hooks for learning” to encourage the user into the ‘knowledge hub’ for an extended learning opportunity.

‘Knowledge Hub’

- Content is cross-specialty
- The format is with written content, podcasts, videos, illustrations and photographs, as well as signposting external links to relevant websites and organisations
- ‘Knowledge Hub’ resources can be assembled to create different education packages or for a bespoke learning experience

Topics include...

Genes and genetic conditions
Inheritance patterns
Genomic technologies
Communication resources
Genomic Medicine Service infrastructure (GMSAs and GLHs)

Governance

GeNotes is supported by robust governance with a clear working group structure, funding and content development/editorial and administrative support.
Working group membership is multi-professional and representative of the specialty. This infrastructure will ensure that the resource can be sustained, amended and updated as appropriate.

Progress

November 2021

Core Reference Group (CRG) established

December 2021

Multi-professional Fetal & Women’s Health Working Group (WG) established with * Midwives * O&G trainees & consultants * Genetic Counsellors * Clinical Geneticists *

The first review of articles is underway, as is the development of the underpinning genomics ‘knowledge hub’ resources.

Private beta site testing of the Oncology GeNotes resource has been conducted, with positive feedback on content and accessibility. Private beta testing of Paediatrics GeNotes is currently in progress. Maternity resources will proceed directly to public testing

The Fetal and Women’s Health GeNotes will launch in Summer 2022 and be available on the Health Education England’s Genomics Education Programme (GEP) website.

Getting involved in GeNotes and Genomic Education

If you have an interest in prenatal genomics and women’s health and in the future would like develop additional topics for the GeNotes resource please contact the Genomics Education Programme (details below).
The Genomics Education Programme platform has a variety of educational resources for a range of professionals that wish to learn more about genomics in healthcare.
