

Core outcome set: Multiple long-term conditions in pregnancy

MuM-PreDiCT

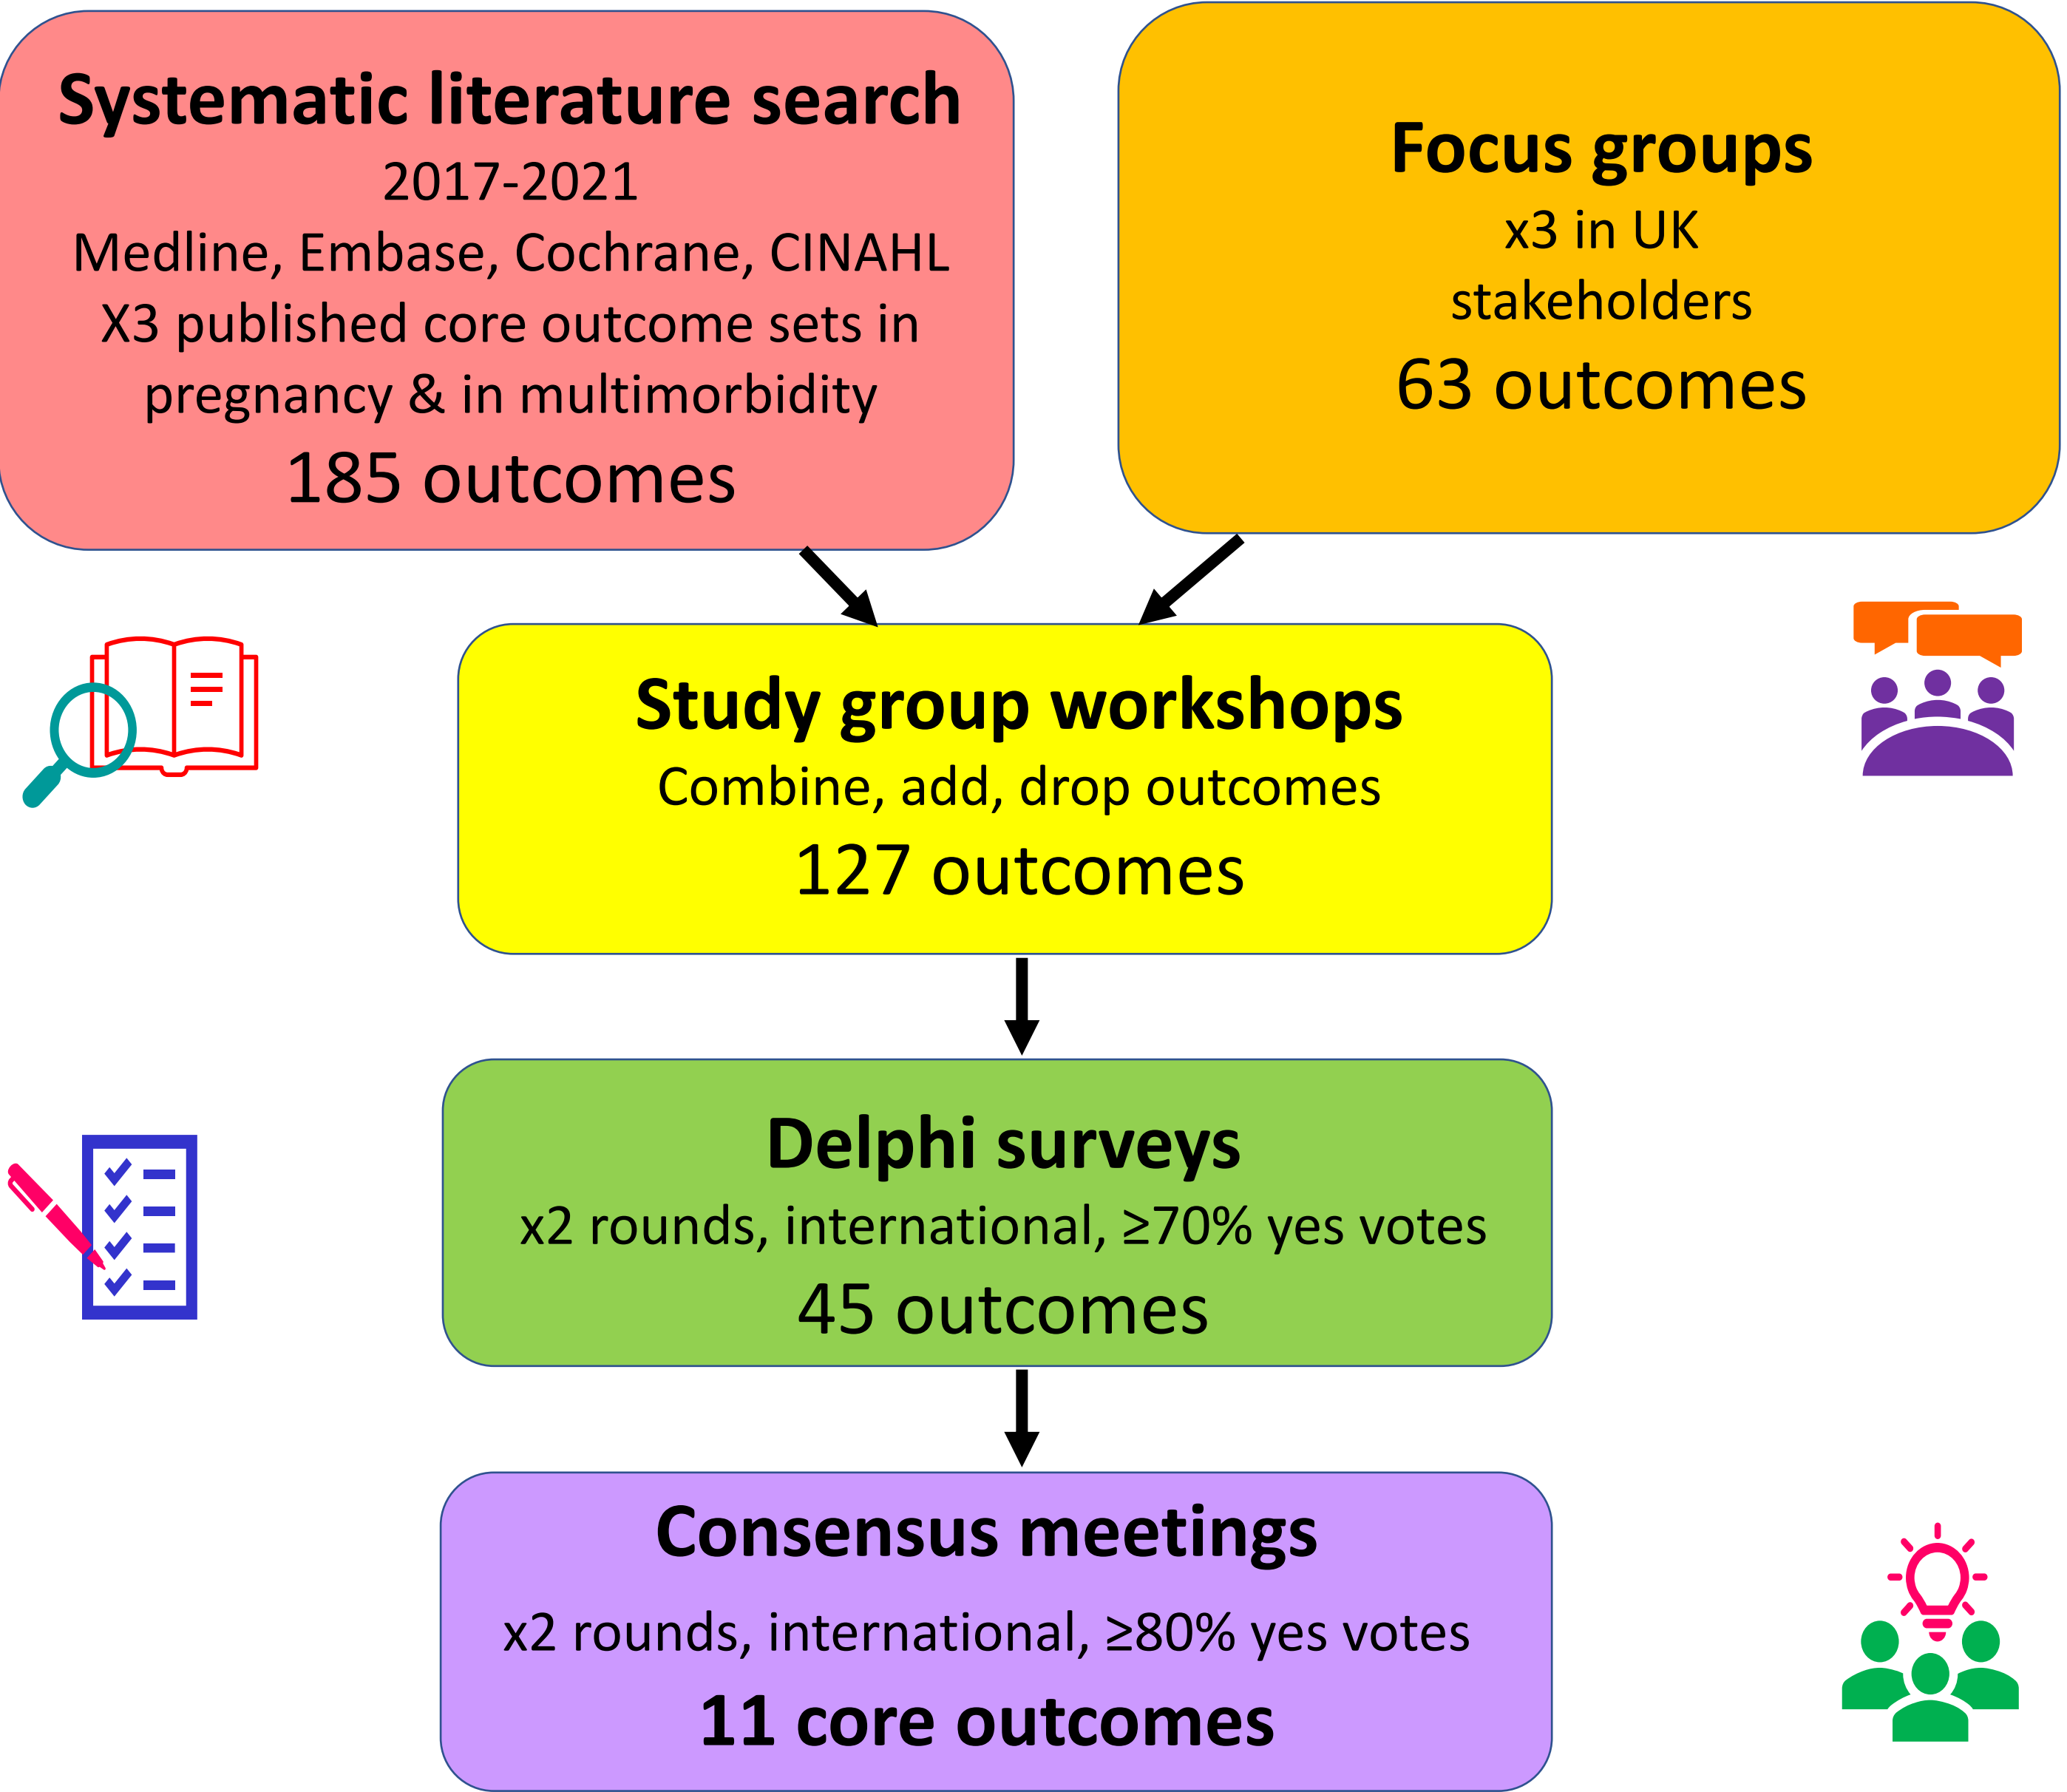

What is a core outcome set

Outcomes: did an intervention work
impact of a health condition

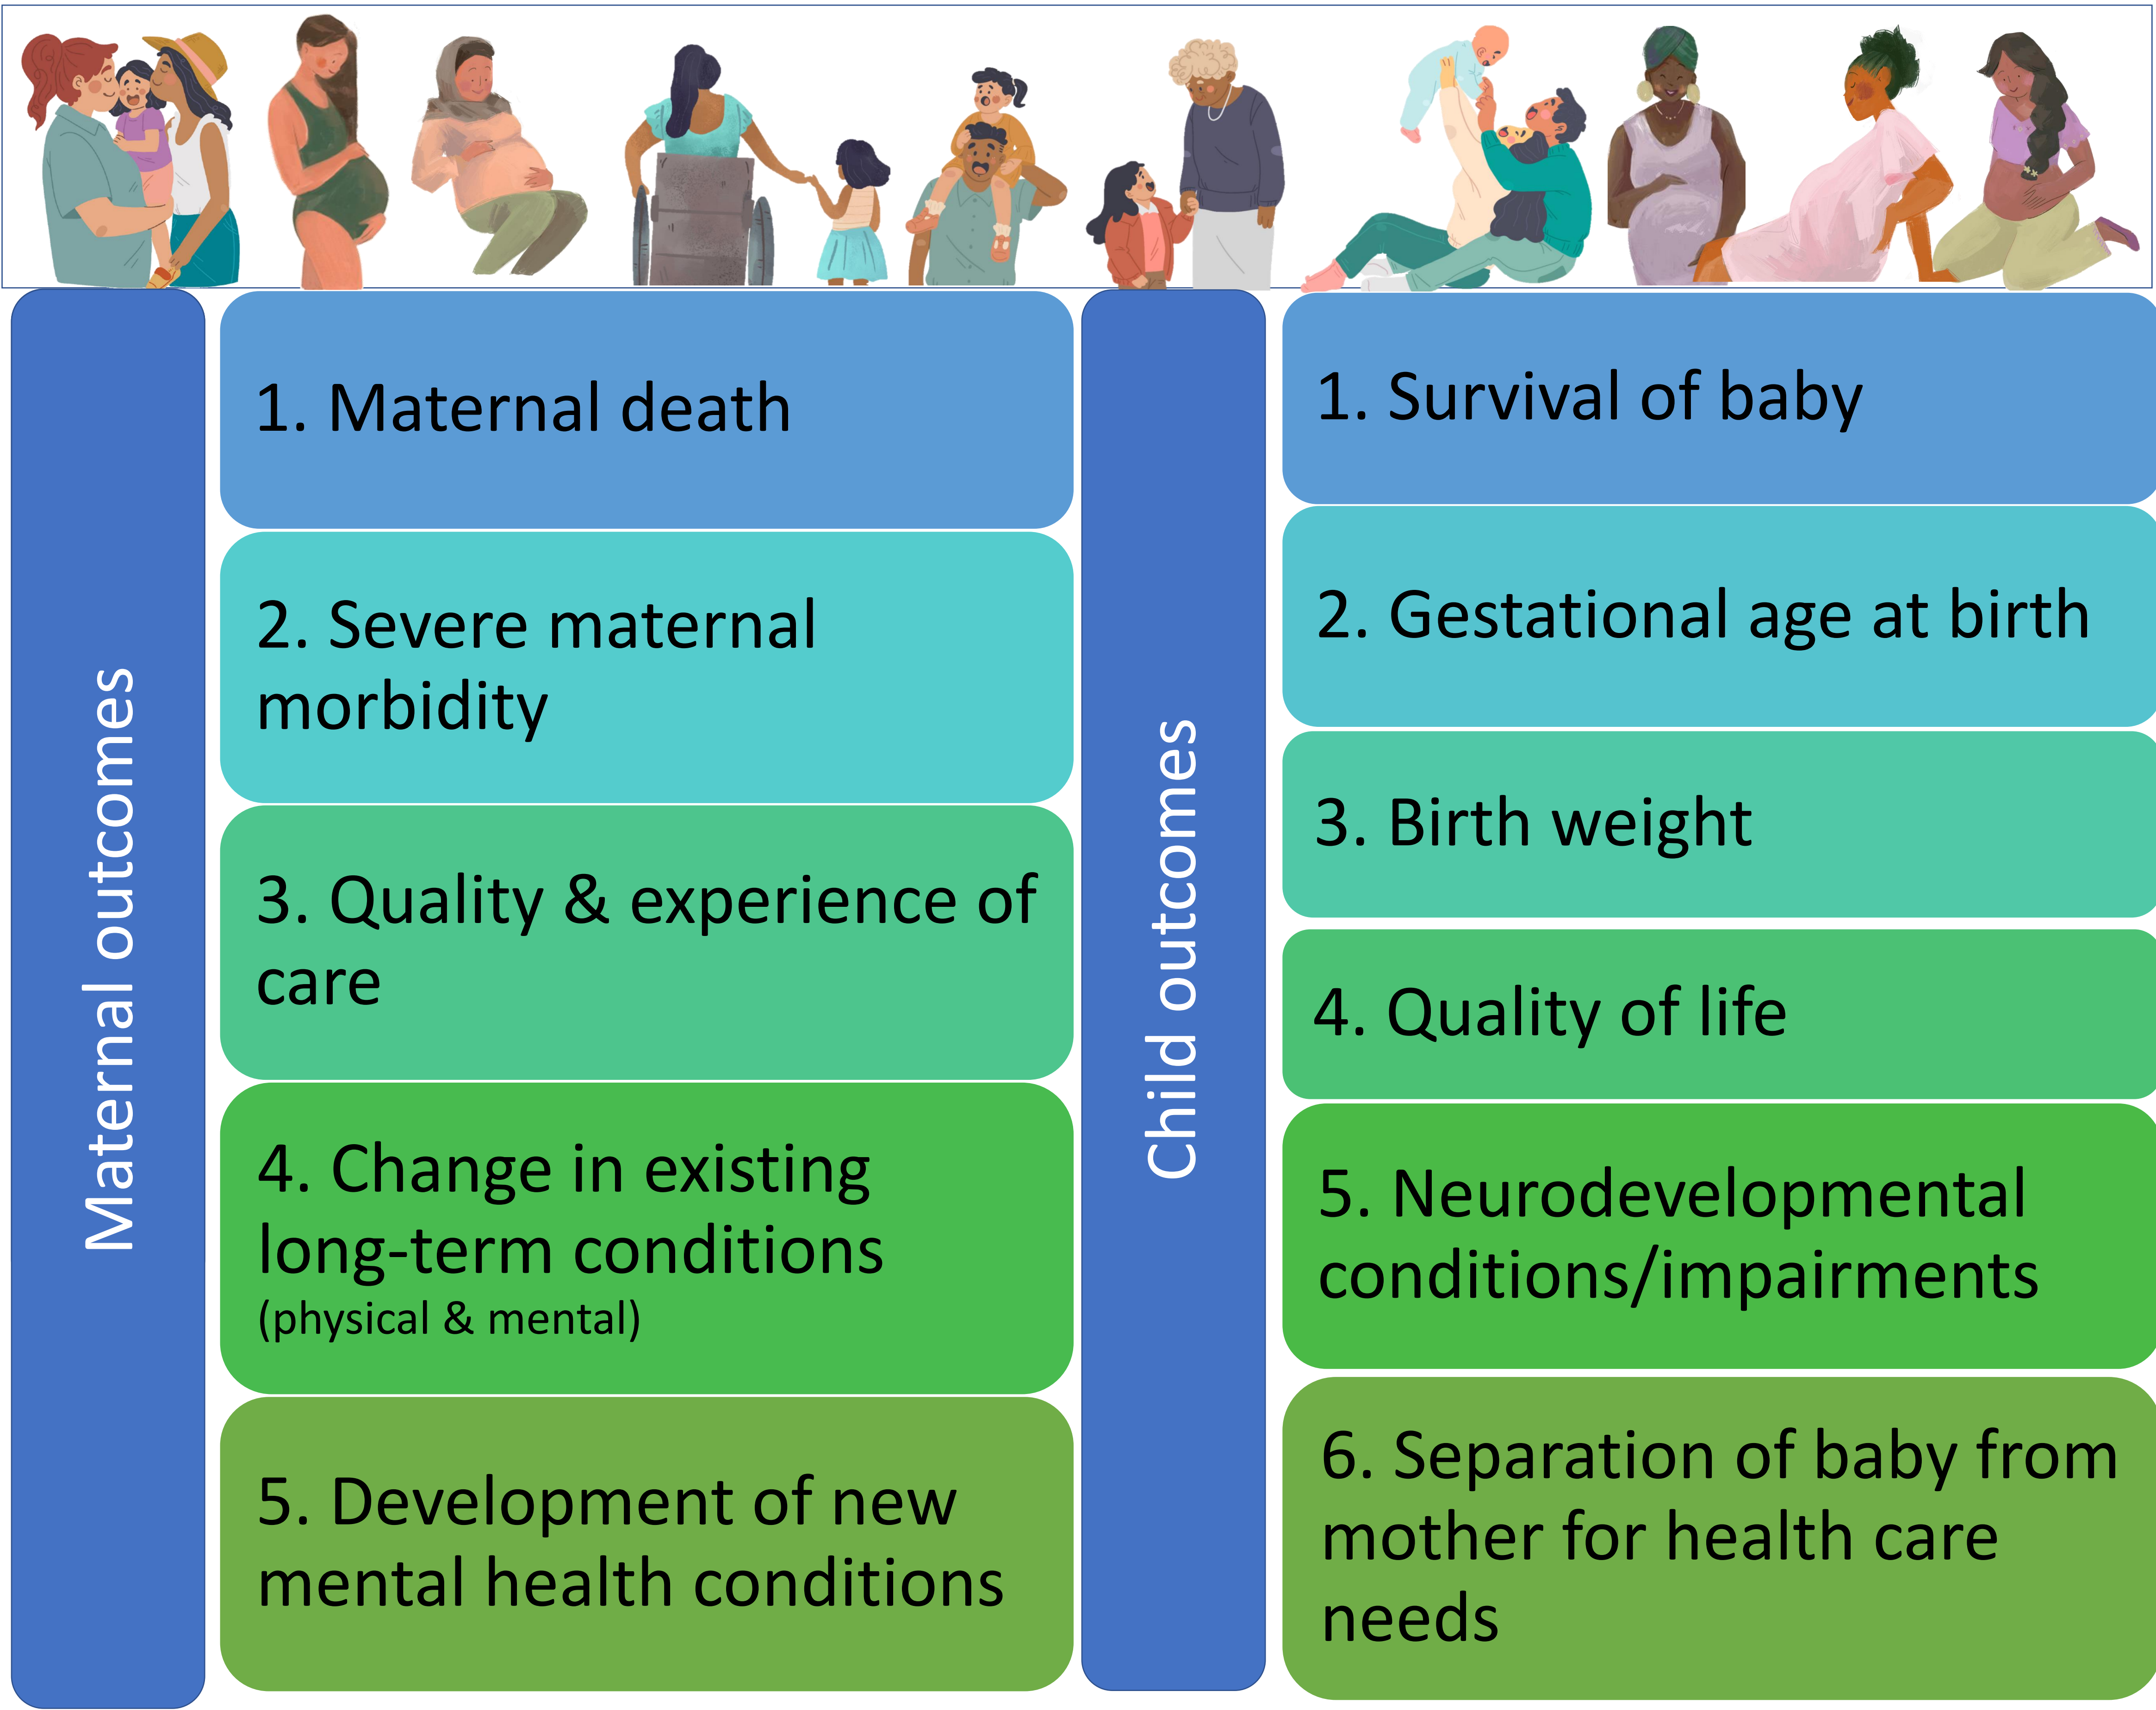

Core outcome set: a standard set of outcomes
reported in all studies as a minimum
enables **evidence synthesis**

Scope: multiple long-term conditions in pregnancy
antenatal, peripartum, postnatal, longer-term
maternal & child outcomes
observational & intervention studies

Methods

Final core outcome set

Stakeholders

Activities	Women /partner, n	Clinicians / researchers, n	Total, n
1 st focus group	-	8	8
2 nd focus group	6w	-	6
3 rd focus group	6w + 2p	-	8
1 st Delphi survey	62w + 1p	146	209
2 nd Delphi survey	38w +1p	77	116
1 st consensus meeting	6w	7	13
2 nd consensus meeting	9w	8	17

Discussion

Strengths: Wide range of participants, strong involvement of patient representatives

Limitations: High attrition, may not be generalisable to low middle income countries

Next step: Develop consensus on how to define & measure the core outcomes using COSMIN guidance
