LaserDock 2 by Patient Pocket LLC

Laser and Surgical Smoke (SS) Protection in a Single Package

- *Integration of two safety systems that prevent accidental laser energy discharge and enable SS filtration and evacuation*
- *Self-contained power enabling use in remote clinical sites, field venues, or other low-resource settings as well as traditional clinical settings.*
- *Combined vacuum and filtration capabilities allowing for rapid suction and detoxification to take place within the surgical field including mitigation of SS particulate or SARS COVID-19 particulate exposure through ULPA filtration.*
- *Protection of patients and personnel from accidental laser discharge.*
- *Savings from damaged, dropped, or contaminated fibers.*
