NeuronSphere®

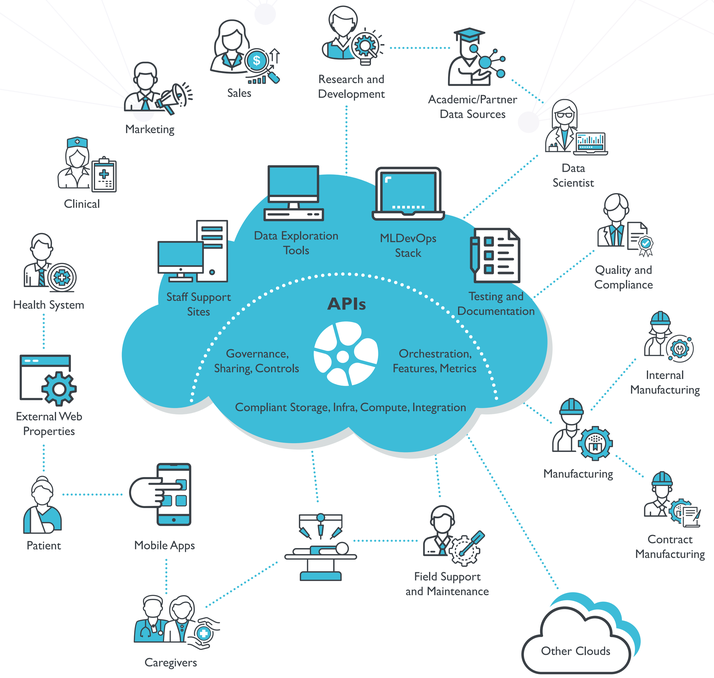

"We've not been able to view our data this way until now"
– Ritwik Ummalaneni, Staff Robotics Engineer, Moon Surgical

We know data. We know medical devices. We know startups through global organizations. Wherever you are in your lifecycle, NeuronSphere will help you go faster.

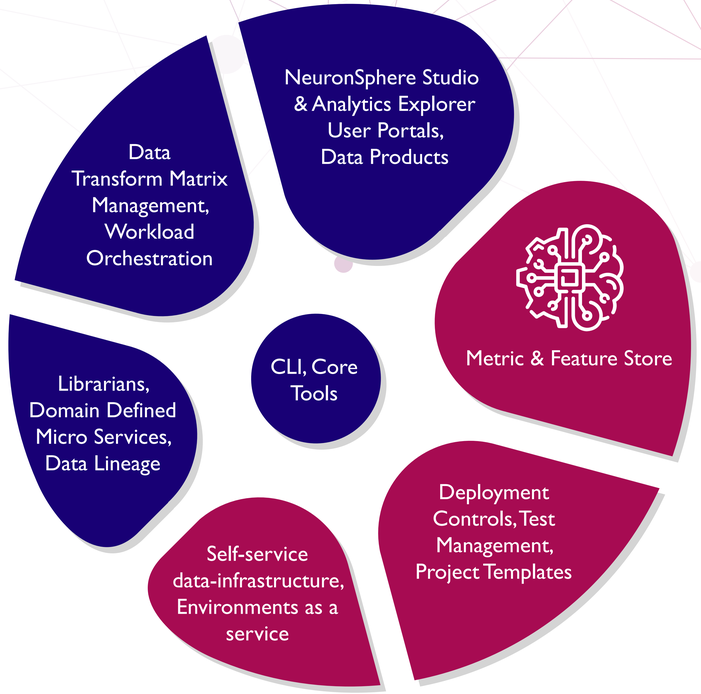

NeuronSphere® is a next-generation data ecosystem that provides medical device companies with turnkey access to enterprise capabilities such as infrastructure, ingestion, analytics, machine learning and data pipelines, at a fraction of the time and complexity. The result is a reliable, scalable, and compliant data ecosystem fully configured for your use cases.

"With NeuronSphere, we expect better access and visibility to operating data from our field-based systems, at a cost equal to a fraction of building our own teams to create and manage an equivalent capability. Already, our dashboards have been excellent."

– Frank Grillo, VP Marketing and Business Development, Noah Medical

Your device data is an enterprise-wide asset, NeuronSphere refines its value

A complete suite of components, tools and SaaS services designed for intelligent medical device companies
