Academic-community partnerships to promote safety and linkage to care for ED patients experiencing IPV

Alice Lu MSL, Elizabeth Raby BS, Eva Kitlen BS, Stephanie Lawless BS, Caroline Burke MD, Leigh Kimberg MD, Theresa Cheng MD JD, Christopher Peabody MD MPH

University of California San Francisco

Methods: Design thinking in partnership with community experts

Results

- ✓ Increased # of IPV services we have referral info for from **1 hotline to 42 social & legal services**
- ✓ Developed templated survivor-centered handouts in **7 languages**
- ✓ Identified **5 opportunities** for future QI in partnership with CBOs

Discussion

- Survivors face barriers to disclosure and linkage to care.
- Partnering with the community is a best practice
- Consult community throughout the design and evaluation process.
